

Kobalto 1/3 Sales Requirements

The **GMCW Kobalto 1/3** is a 1-bean, 3-powder Super Automatic Coffee Brewer. The following items must be discussed and agreed upon before an installation can be scheduled.

Cleaning: There are daily, weekly and monthly cleaning requirements that must be understood and routinely performed on this brewer. Please refer to cleaning instructions for details.

Electrical: This unit requires 120/208 or 120/240V 30A 60Hz. With dedicated circuit breaker. (4-wire service: Two Hot, One Neutral, One Ground)

Plumbing: Requires plumbed in water service; must be installed in compliance with local codes. 30 to 80 psi allowable water pressure range. 1 gpm minimum water flow rate. Brewer is provided with water softening/filtration system that must be installed and utilized with this brewer, failure to install this filtration system will void the warranty.

Drain: This brewer is equipped so that it can be plumbed into floor drain.

Installation: Factory trained, professional installation and training service is available. See catalog for current pricing and requirements. Installer must be well versed in local electrical and plumbing codes as well as the installation/calibration procedures associated with this brewer.

Layouts: The Kobalto 1/3 has 9 default Layouts available. Each layout has its own unique beverage characteristics: Review each layout and choose one. The physical locations of the buttons are changeable. Also Alternates can be switched with Defaults. Attached are detailed configurations of each Layout. Listed below is the synopsis of each Layout.
