

INSTALLING *TrueFlex*® BOTTLE ORGANIZERS (20 oz.) 921308

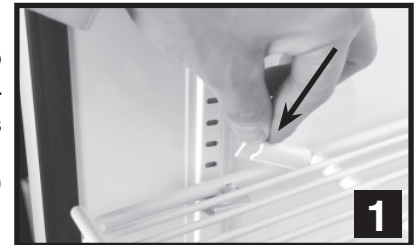

NOTE:

When installing shelves, be sure to plan adequate space between shelves for product to be stocked and removed.

Step 1

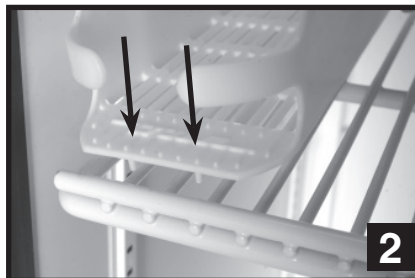

Install wire shelves so rear shelf clips are four slots higher than front shelf clips (for gravity feed). To prevent shelves from sliding forward be sure to install shelf retainer clips (image 1).

Shelf retainer clip installation, both sides.
(retainer clip position varies depending on model, GDM-12 shown)

Step 2

Place *TrueFlex* organizer along tank side. Guide bottom tabs between the first and third wire supports as shown (image 2).

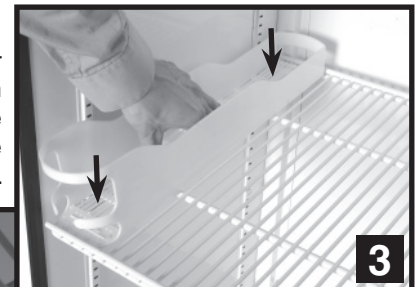

Guide bottom tabs between first and third wire supports.

Step 3

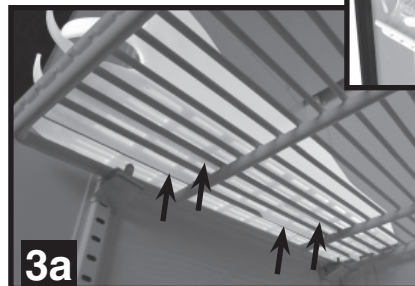

Firmly press and slide hand along inside of *TrueFlex* organizer until it snaps in place on top of shelf (image 3). Tabs grip between shelf wire supports (image 3a).

Press organizer down until bottom tabs snap into place between shelf wire supports.

Step 4

Line up second *TrueFlex* organizer against the side of the first one and press into place as before. Continue the process until shelf is filled out (image 4).

Tabs snap in place under wire shelf supports.

NOTE:

Organizers may not fill entire width of shelf.

Organizers in place.

Organizers merchandised with 20 oz. bottles.
