

Huskee® BackSaver™

Immediately Reduce the Risk of Back Injuries!

Huskee® BackSaver™

This receptacle has the strength and durability of the Huskee® and more. 8 internal lift vents break the vacuum caused when removing a poly liner. Add an optional lid or dolly to contain odors and add mobility.

When used with
Continental® Dome Top

- Product quality testing has proven a 50% reduction in force needed to remove a bag of trash.
- More structural ribs on the bottom of the receptacle add rigidity and durability.
- Huskee® BackSaver™ is available in two popular sizes: 32 gallon and 44 gallon.

* Compared to competitive models
