

Triumph Heat Wave Spotter

Remove spots and spills effortlessly with the Triumph Heat Wave heated spotter.

The Triumph Heat Wave spotter is a perfect complement to larger carpet extractors. This compact unit is designed to easily and conveniently clean small spots and spills before they become permanent carpet stains.

The spotter has a powerful 750 watt in-line heater, 2-stage vacuum motor, 55 psi pump, 90" of water lift and a 2.5-gallon solution/recovery tank.

The Triumph Heat Wave spotter extractor comes standard with an 8' solution and vacuum hose, 4" metal hand tool and is built for daily use

under rugged conditions. The easy-to-dump recovery tank makes emptying dirty water a breeze. This unit is simple, productive and built to last. This unit is especially suited for use in hotels, hospitals, long-term care facilities, child care centers, health clubs, office buildings, auto dealerships, correctional institutions and cleaning contractors.

Contact your Pacific distributor for more information on the Triumph Heat Wave spotter extractor.
