Vertical Masticating Juicer

Model **VRT350** Vertical Masticating Juicer

The VRT350 Juicer's dual-stage juicing system ensures maximum juice and extremely dry pulp, the first crushing stage extracts and the second pressing stage squeezes. Its Low Speed Technology System (LSTS) and low rotation speed of 80 RPMs result in minimal heat build up and oxidation, which means higher quality juice, flavor, and nutrients. The VRT350 Juicer also features an Automatic Wiping System that utilizes a silicone wiping blade, similar to a car's windshield wiper, to help keep the juicing screen free of excess pulp.
