FEATURES / BENEFITS

■ MODERN DESIGN

By harmonizing curvature and rigidity, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics.

■ AUTOMATIC CONDENSER CLEANING SYSTEM

The accumulation of dust in the condenser causes the failure or breakdown of refrigerators. They run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products in coolers. The automatic condenser cleaning system keeps the condenser clean and prevents system failure by automatically brushing daily.

■ ENVIRONMENTALLY FRIENDLY, EFFICIENT REFRIGERATION SYSTEM

Turbo Air's refrigerators are designed with oversized and balanced environmentally friendly R-404A (CFC Free) refrigeration. These include large evaporators and condensers for faster cooling and balanced temperature throughout the cabinet.

■ ATTRACTIVE GLASS SIDED ELEGANT EURO DESIGN

Glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application.

■ DESIGNED TO OPTIMIZE IMPULSE SALES

Ideal for eye-catching displays and convenient access with fast service in high traffic area.
