Countertop Cooking Meets Chrome-Plated Convenience

Enjoy unmatched convenience and energy savings with Cooking Performance Group Ultra Series chrome-plated countertop electric griddles! Available models come with a 208/240V electrical connection and include two to four burners so you can find the right fit for your establishment. The precise, adjustable temperature controls make cooking lunch and breakfast foods a breeze. Unlike steel griddles, chrome-plated griddles do not absorb food particles, greatly reducing flavor transfer. The chrome surface also prevents sticking so that you can cook everything on your menu from delicate eggs to juicy burgers with no mess and no carry over flavors! This reliable, attractive line of griddles looks great in front-of-house applications and allows for faster cooking at lower temperatures. With a full-width grease trough and 4.5 qt. grease drawer, these griddles are the complete package of excellent performance and worry-free maintenance. Each CPG Ultra Series chrome-plated countertop electric griddle ships with a free chrome griddle cleaning kit for added convenience during cleanup!

351GUCPG24M

4 independently controlled burners
208/240V, 12,000W / 16,000W

Proper Care for Chrome Griddles

To ensure maximum performance, you will need to use non-metallic, high-heat utensils. Never chop, hack, or hit the griddle surface as this will cause irreparable damage. Cleaning kit includes caddy, Noble Griddle Klean and Chrome Griddle Polish Powder, recommended scraper, brush, and turner. #351CHRMGEAR
