		Case L,W,H	8.44 IN, 8 IN, 8.31 IN
Tie x High	26 x 5	Cube	0.33 CF

Preparation and Cooking

Bake: Monosodium Glutamate (MSG-Flavor Enhancer) is white in color and brings out and restores flavor to foods without adding flavor of its own. MSG is a substance found in all living things. It is a chemical rather than a spice. However, there are a limited number of people (about 2% of the world's population) who have an adverse reaction to MSG.

Ready To Eat: No preparation necessary. McCormick Culinary® MSG Flavor Enhancer is ready to flavor any savory entrée or side. Dispense as little or as much as you desire with our convenient shaker or spoon dispensing options.

Serving Suggestions

Mccormick Culinary® MSG Flavor Enhancer adds savory flavor to: • Lentil soup with beef • Ahi tuna poke bowls with red onion, scallions and toasted macadamia nuts • Chicken sesame salad with scallions and slivered almonds • Garlic butter broccoli • Fried rice with ginger and scallions

Packaging and Storage

Mccormick Culinary® MSG Flavor Enhancer has a shelf life of 720 days when stored tightly closed in a cool, dry place to protect against flavor loss and moisture. Avoid exposure to heat, humidity, direct sunlight and fluorescent light to maintain flavor and color. Always use dry measuring spoons and cups to ensure optimal product integrity.
