Additional Handling Instructions

SCOOPABLE DRAGON FRUIT 3-GAL TUB HANDLING PROCEDURES

We offer two storage options for scooping the Dragon Fruit @ retail locations. A small tempering cabinet can be utilized in the front service area or you can purchase a ColdCrock holding unit for the tub & keep them on the back-counter service area for easy scooping.

OPTION 1: WHEN THE 3 - GAL TUB IS STORED INSIDE A TEMPERING CABINET:

- Keep tub frozen at all times. When stored at -20°F to 0°F. Best by date is stamped on the side of the tub in black ink.
- The colder the storage temperature, the longer the quality shelf life. Repeated changes in temperatures will cause product to develop a 'skin' on the surface, icy texture, and lose the creamy texture.
- Always use clean, sanitized utensils, & good hygiene practices when scooping. Clean

PRODUCT SPECIFICATIONS

Org., Frozen Scoopable Dragon Fruit, 3 Ga.

hands & disposable gloves are required.

- ☐ Prior to use, temper tub to 5°F +/- 2 for optimal scooping, product quality and performance
- ☐ Recommend setting dipping / tempering cabinet 5°F +/- 2 and place tub in cabinet 24 hours prior to use. Store tub in tempering cabinet for continued use.
- ☐ If multiple tubs are tempering, the time needed to temper & scoop maybe be longer.
- ☐ Once scooped, product can be used to make a smoothie or scooped directly into a bowl for serving.
- ☐ Large changes & fluctuation in temperature will result in poor quality product.
 - For example, if product is thawed to warmer temperatures than recommended & put back in frozen storage repeatedly, the product will become icy & will lose its creamy texture.
- ☐ Store product with the lid on as much as possible to protect from contamination & keep temperature constant. If product develops ice or a dry skin on the surface, this can be scraped off with a clean spade or scoop prior to serving.
- ☐ When lid is off, store lid in a clean, dry area. Alternately, clean wax paper may be used to cover the product (be careful to completely remove prior to scooping).
- ☐ Follow all food safety handling procedures when storing and serving the Scoopable Dragon Fruit

- ☐ Shelf life of tub once tempered is 7-10 days for optimum quality

OPTION 2: WHEN THE 3 - GAL TUB IS HELD IN A COLD CROCK UNIT

- ☐ Day 1 - Remove clean ColdCrock from freezer. Load with product, make sure lid is placed on top of product when not scooping. This helps to protect the product from contamination & maintain temperature.
- ☐ For optimum scooping quality, store tub in ColdCrock for no longer than 6 hours per day
- ☐ After recommended usage time of 6 hours, rotate product to a new Coldcrock from freezer that has been cleaned, sanitized, air dried, stored in freezer for minimum of 8 hours OR place tub back into freezer & leave ColdCrock out to completely thaw & clean.

When ColdCrock is used, it must be cleaned, sanitized, air dried, and stored in freezer for minimum of 8 hours before reuse.
