

Fabric Softener

Liquid Laundry Softener

Net Contents: 5 Gallons

Fabric Softener

FABRIC SOFTENER is a concentrated static reducer and laundry softener that adds a smooth, silky feel to flatwork and linens. It also aids in fluffing out towels, clothes and cloth diapers leaving them comfortably soft and smelling fresh. **FABRIC SOFTENER** reduces static on nylon and other synthetic fibers making them easier to clean and more comfortable to wear. Less wrinkling, sticking and static also means increased ironer speeds and productivity in flatwork operations. Using **FABRIC SOFTENER** will also reduce extraction and drying times which will effectively cut down laundry cycle times. Safe for use on natural and synthetic fibers.

DIRECTIONS:

FABRIC SOFTENER is to be used in conjunction with the other Noble Chemical laundry products for a personally tailored laundry operation. **FABRIC SOFTENER** is specially formulated to be dispensed directly from the shipping container through an automated injector system into the laundry machine, thereby eliminating hand feeding from powder hoppers and possible spillage. For normal laundry conditions, use 2 to 4 ounces of **FABRIC SOFTENER** per hundred pounds of work. It is completely soluble at all normal water temperatures, and can be used at cold or warm (70-120 °F) temperatures.

INGREDIENTS: WATER (CAS# 7732-18-5), IMIDAZOLINE QUATERNARY COMPOUND (CAS# 68410-69-5), COLORANT, FRAGRANCE
