Low Temp San

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

CHEMICAL SANITIZING WAREWASHING: Remove gross food particles and soil by pre-flush, or by pre-scrape and when necessary, pre-soak treatment. Then place wares in dishwasher. Be sure dishwasher is dispensing proper type and amount of detergent. Dispense Low Temp San into the final rinse water at a concentration of 100 ppm of available chlorine. Only a qualified service representative should set or adjust dispenser on the machine. Do not use on sterling silver or silver plate. Dispenser must be set to deliver 6.5 cc of sanitizing solution per gallon of water to give 100 ppm of available chlorine. To insure the chlorine concentration does not fall below 50 ppm, periodically test the rinse solution with a suitable test kit and adjust the dispensing rate accordingly. Maintain contact time with sanitizer for at least 2 minutes. Minimum final rinse temperature of 140°F is required.

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

STORAGE: Keep material dry and in a dry place. Store in original container, where temperatures do not exceed 125°F (52°C) for 24 hours.

PESTICIDAL DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying. Triple rinse as follows: Fill container ¼ full with water and recap. Agitate vigorously. Follow Pesticide Disposal instructions for rinsate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

SPILL OR LEAK PROCEDURE: Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained; the material then moved into containers and disposed of by approved methods for hazardous wastes.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. DO NOT get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses and chemically resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse. Vacate poorly ventilated areas as soon as possible. DO NOT return until odors have dissipated.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product. Keep out of lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the sewer treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. MIX ONLY WITH WATER. Mixing this product with gross filth such as feces, urine, etc., or ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs, and mucous membranes.

NOTE: This product degrades with age. Use chlorine test kit and increase dosage as necessary to obtain required level of chlorine.
