

## **NOBLE CHEMICAL SCUM-BE-GONE**

FOR USE ON CHROME, STAINLESS, PORCELAIN, CERAMIC TILE, FIBERGLASS, CONCRETE, TERRAZZO, RESILIENT TILE, ETC.: DILUTE ACCORDINGLY: Light Cleaning - 1:40 ratio (3 ozs. Per gallon of water)

General Cleaning - 1:30 ration (4 ozs. Per gallon of water)

Heavy-duty Cleaning - 1:20 ration (6 ozs. Per gallon of water)

These directions are flexible rather than specific. In many cases a more dilute solution can be used, while for extreme conditions a less dilute solution may be used.

Apply solution freely to the surface with clean sponge, mop, or sprayer. Allow solution to stand at least 5 minutes or more depending on soil condition. After soil is loosened, wipe or pick-up solution and rinse with clean water. For heavier soil conditions agitate with a scrub brush or floor machine to hasten and improve cleaning time and performance.

AS MOPPING SOLUTION ADDITIVE: Add 1 to 2 ounces of concentrate per gallon of rinse water. Rinse floor in the usual manner. Waxed or finished floors will be noticeably cleaner and produce more gloss. Will effectively remove ice melt residue.

AFTER STRIPPING CONDITIONER: Dilute 1 ounce of concentrate per gallon of water and mop on floor. Pick-up with a wet/dry vac or mop. Allow floor to dry and commence to apply finish. This product meets the maximum content requirements for Volatile Organic Compounds (VOCs) as established by State and Federal regulations.
