

# Gatsby™ Serveware Care & Use Instructions

Constructed from high-quality, food-safe, BPA-free ABS plastic, Gatsby™ Serveware provides a durable, hygienic, and weather-resistant solution for transporting and serving food in a variety of settings. Follow these easy guidelines to maximize the performance of your items.

## Basic Care Guidelines

## Care & Use Tips

### General Use:

- **Not recommended for use with serrated knives or steel wool pads which may cause permanent scratching**
  - Avoid extended exposure to stain-causing foods such as tomato, carrot, and curry
    - Do not use in oven, microwave, or over hot flames
  - Not recommended for prolonged use under a heat lamp

### Dish Machines:

- Use a high temperature dish machine
- Avoid corrosive chlorinated or phosphate-based detergents
  - Use a water softener if hard water is present
- Do not use sanitizers in combination with high-temperature dish machines
  - Ensure detergent feeders are set within the recommended usage levels
    - Completely Empty the rinse water in the dish machine daily
    - Remove from dish machine promptly after cycle completion
  - Periodically presoak overnight in a plastic-safe presoak solution

### To Remove Stains & Build-Up:

In certain environments, Gatsby™ Serveware may experience occasional hard water buildup or food staining. This can usually be resolved by soaking overnight in a plastic-safe pre-soak solution (e.g. Dip-It, OxyKleen)

### Recommended Detergents:

- Ecolab® Solid Power XL • Ecolab® Ultra Klene • Auto-Chlor® Mach Detergent 3X

### Recommended Rinse Agents:

- Ecolab® Ultra Dry • Ecolab® Solid Brilliance • Auto-Chlor® Auto-Kleen M.S.

### Optional Pre Soak Solutions for Stain Removal:

- Ecolab® Dip-It • Auto-Chlor® OxyKleen
