MANUAL COMMERCIAL
CITRUS JUICER + SAFETY SPRING

**Safety Spring
Replacement Kit**
(181SPRGMCJ2)

MODELS

181MCJ2 - Manual Citrus Juicer with Safety Spring

SAFETY INSTRUCTIONS

Safety:
This juicer should only be operated by trained individuals. Be sure to read the operation and cleaning guide before using.

CAUTION: KEEP HANDS CLEAR OF JUICING FUNNEL WHEN IN USE TO AVOID INJURY RISK.
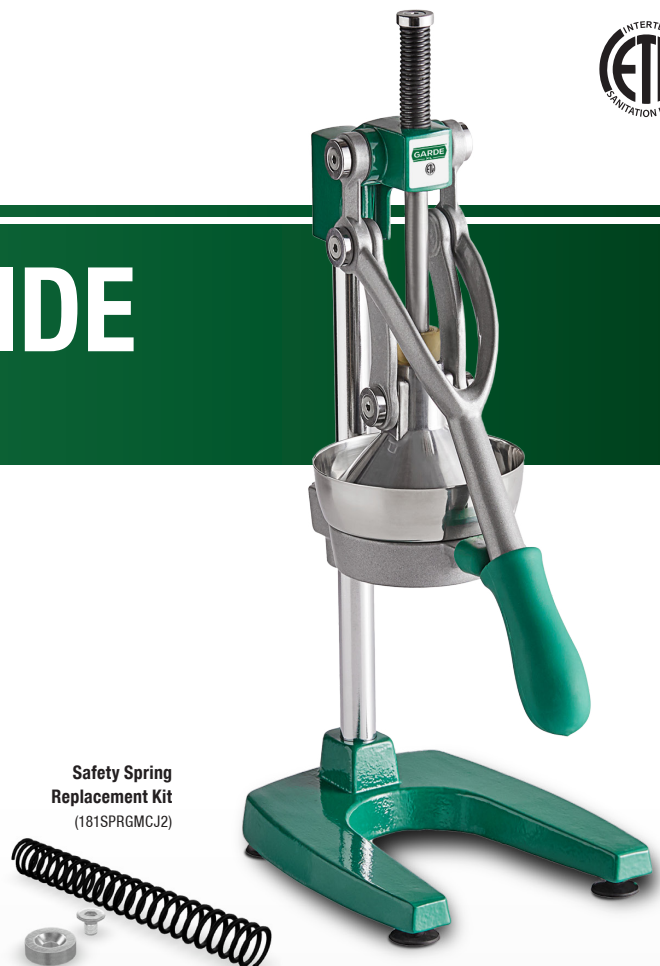

OPERATION

1. Position the juicer on a flat, dry countertop.
2. Press down on the base so that the suction cups hold the juicer to the counter.
3. Lock the bowl and straining funnel in place. There are notches on the bottom of each which can be inserted into the base and twisted to lock in place.
4. Place a container underneath the funnel to receive the juice.
5. Place halved fruit on reamer and hold in place until the push block is in contact with the fruit.

   REMOVE HAND BEFORE APPLYING DOWNWARD PRESSURE.

6. Press the handle down to extract juice.
7. Release handle and juicer will return to the upright postision.

USE CAUTION WHEN CLEANING

1. Remove reamer and strainer bowl from base.
2. Wash with mild soap (such as Noble Chemical's 147SUNBRIGHT) and warm water.
3. Wipe the juicer with damp, soft cloth and sanitizer (such as Noble Chemical's 147QUIKSAN).
4. Allow parts to dry and reassemble.

REPLACING THE SAFETY SPRING

1. Hold the handle in the upright position. Using an Allen wrench, remove the screw from the knurled nut hat that is connected to the top of the safety spring shaft.
2. Remove the knurled nut hat, and then remove the safety spring from the shaft.
3. Place the new safety spring in the shaft.
4. Reconnect the knurled nut hat to the top of the shaft using the screw and the Allen wrench.

REPLACEMENT PARTS

These parts can be purchased from the same location as the juicer.

ITEM NUMBER	DESCRIPTION
181PMCJCONE	Cone
181PMCJCUP	Cup
