

SAFETY INFORMATION FOR HYDRION TEST PAPERS AND STRIPS

Hydrion test papers are classified as articles under osha regulations. Hydrion test papers do not require formal material safety data sheets or certificates of analysis (under osha standard – “hazardous communications” – 29 cfr 1910.1200). They are safe for shipment by air, sea or ground transportation.

Our test papers consist of indicator dyes that have been impregnated into paper. These papers are to be used in vitro only and not to be used internally. The concentration of impregnated dye is small.

Hydrion test papers consist of stable, non-reactive materials. They are non-volatile and not radioactive. Hydrion test papers and their components do not contain latex, mercury, lead, or conflict minerals. These papers can be discarded according to local environmental waste procedures and regulations.

Hydrion sanitizer and oil quality test papers and strips have a shelf life of 2 years and should be stored in dry environment and protected from direct sunlight.
