

**PLEASE INSTALL THE
ENCLOSED CLIP TO SECURE
THE FILTER BASKET.**

-
1. Remove the funnel handle mounting screw.
 2. Visually inspect the funnel assembly for proper positioning of the filter basket in the groove.
 3. Install the clip over the filter basket and reinstall the handle screw through the hole in the clip. (see illustration)

NOTE: To minimize the chance of plugging the drip-out hole in the bottom of the funnel, it is imperative that the clip be reinstalled whenever the handle is removed.
