

FreshFry Pods

5 tips for successful integration

1

START WITH FRESH OIL

Pods will not take dark and dirty oil back to light and fresh oil.

2

CONSISTENCY IS KEY

(See #1) Drop a Pod at the end of every day you fry - not just at the end of the oil life - for maximum effectiveness.

3

SINGLE USE ONLY

Each Pod is one-time use and then can be safely thrown away in the trash.

4

CONTINUE YOUR USUAL FILTRATION PRACTICES

Pods do not remove crumb particulates - you should still skim your fryers.

5

SIZE MATTERS!

Pods are not recommended for use in small countertop fryers; the science works best on 35 lb. fryers and up.
