

# WARNING

## GREAT THINGS ARE WORTH THE WAIT

JEALOUS DEVIL ULTRA-PREMIUM FUELS LIKE ONYX AND HEX ARE DENSE AND POWERFUL. TRYING TO USE TRADITIONAL FIRE-STARTING METHODS TO LIGHT THEM IS LIKE TRYING TO CREATE A SUPERNOVA WITH A BIRTHDAY CANDLE.

TO ENSURE A LEGENDARY EXPERIENCE FOLLOW OUR LIGHTING INSTRUCTIONS:

1

### USE A CHIMNEY STARTER

EVER WONDER HOW THEY STARTED THE FIRES IN HELL? THEY USED A CHIMNEY STARTER... WHEN LIGHTING HEX MAKE SURE TO PLACE THEM VERTICALLY IN THE CHIMNEY.

2

## JEALOUS DEVIL Boom! FIRESTARTERS

### DOUBLE THE BOOM!

USE (2) BOOM! FIRESTARTERS WITH YOUR CHIMNEY. IF YOU ARE USING ANY OTHER STARTER, USE AT LEAST FOUR TIMES MORE THAN YOU TYPICALLY WOULD.

3

### IF USING AN ACTIVE STARTER

EVEN IF YOU ARE USING A BLOW TORCH OR ELECTRIC STARTER, WE STILL SUGGEST USING A CHIMNEY ESPECIALLY FOR HEX (AS THEY LIGHT MUCH BETTER WHEN PLACED VERTICALLY). IF YOU DO NOT HAVE A CHIMNEY, ALLOW SUBSTANTIALLY MORE TIME THAN YOU TYPICALLY WOULD TO SET THE FIRE.

4

### BBQ PURGATORY

DEPENDING ON CONDITIONS, IT CAN TAKE UP TO 30-60 MINUTES FOR YOUR JD FUEL TO BECOME FULLY LIT, SO PLEASE BE PATIENT. PURGATORY ENDS ONCE 100% OF YOUR FUEL IS GLOWING RED HOT FROM END TO END WITH NO VISIBLE BLACK SPOTS REMAINING.

5

### RAISE THE DEAD

WHEN DONE COOKING SIMPLY SMOTHER OR DOUSE WITH WATER. BOTH HEX AND ONYX CAN BE REUSED MULTIPLE TIMES.

STILL CAN'T LIGHT THE FIRE? PERHAPS YOU SHOULD CONSIDER BAKING CUPCAKES INSTEAD OF MAKING LEGENDARY BBQ...
