

How to Use

1. Remove the bait station from packaging.
2. Place bait station flat side down on the floor in areas where you've seen signs of mice. Make sure the location is inaccessible to children, pets, or domestic animals.
3. To refill, press the release tab on the back of the station while using the other hand to squeeze one of the front release tabs. Pull to open.
4. Remove two new bait blocks from the package while wearing the included gloves.
5. Place a new bait block on each holder post. Then slide the front of the station back into the housing until you hear it click.
6. Follow up: Wearing gloves, collect and properly dispose of dead rodents and leftover bait.
