

How to Set the Rat Zapper® Classic Rat Trap

For your convenience, the Rat Zapper® Classic Rat Trap is very easy to use. Get your trap setup by following these four simple steps:

1. **Add Bait** - Apply a small amount of high-protein bait, such as peanut butter, to the back wall of the trap away from the metal plates using a Q-tip or other tool to avoid transferring your scent.
2. **Insert Batteries** - Remove the battery cover. Insert 4 "AA" batteries into the battery compartment before replacing the cover.
3. **Place the Trap** - Place the trap on a flat surface against a wall where you have seen signs of rodent activity. The trap should be placed lengthwise with the entrance nearest to the wall.
4. **Turn On** - Activate by flipping the switch to the "ON" position. A green light will blink once to indicate the trap is functioning properly.
