Airpot Cleaning Instructions

1. Press the lid release **buttons** to open the lid.

2. Press the lid detach button to completely detach the lid. Remove the lid assembly.

3. Remove the drip through assembly. Detach the down tube, spout, and gasket. Clean with warm water, mild detergent, and a brush.

4. Remove the bellows cap. Clean the bellows, bellows cap, and bellows cap plate thoroughly with warm water and non-abrasive mild detergent.

5. Clean the interior of the tank with warm water and **non-abrasive** mild detergent and rinse thoroughly. Reassemble in reverse order.

6. Wipe the exterior of the unit with warm water and non-abrasive mild detergent and rinse thoroughly.

**DO NOT** put airpot in dishwasher.

**DO NOT** allow chlorine based cleaners to remain in tank.

**DO NOT** submerge entire unit in water.
