NOTICE:

Amerex fire extinguishers are manufactured under a quality system consisting of ISO 9001 and to UL Standards. To protect the UL listing and to keep the warranty in effect Amerex replacement parts must be used.

Genuine factory parts are available to insure proper maintenance - use of other manufacturer's parts releases Amerex of its warranty obligations. Amerex parts have machined surfaces and threads which are manufactured to exacting tolerances. O-rings, hoses, nozzles, horns and all metal parts meet precise specifications and are subjected to multiple in-house inspections and tests for acceptability. The Amerex warranty is voided by the use of generic, off-the-shelf or substitute parts. **DO NOT SUBSTITUTE.**

Amerex Corporation does not service, maintain or recharge fire extinguishers. This Parts Book and the various Amerex extinguisher service manuals are published as a guide to assist qualified personnel in the proper selection of parts and the "Inspection, Maintenance and Recharge" of Amerex extinguishers only. Personnel should receive proper instruction by a qualified agency in the servicing of fire extinguishers prior to servicing extinguishers.

FAILURE TO USE AMEREX REPLACEMENT PARTS OR HEED THE SERVICE MANUAL INSTRUCTIONS COULD CAUSE MALFUNCTION OF THE EXTINGUISHER RESULTING IN SERIOUS INJURY.

Amerex Corporation makes every attempt possible to provide the most current and updated information. Information contained with this brochure is deemed to be as accurate as possible as of the printing date. Routine changes to products, codes and standards, and warranties subsequent to this printing will supersede printed information. Please contact Amerex Corporation for any revisions, updates, or product change.
