

Operations Manual

Apex Pro X1 Hydraulic Automatic Dough Press

Model #: DP1350

PROLUXE
WWW.PROLUXE.COM

Version: 122820

Proluxe is a leading manufacturer of food preparation and cooking equipment designed for the most demanding commercial kitchens. Proluxe equipment is a result of the highest quality engineering and time-tested design.

This manual includes installation, operation, and maintenance procedures for your new hydraulic dough press. Please read this manual carefully and keep it with your machine for proper operation and lasting service.

INSTALLATION

Domestic

Use a separate 15 amp AC circuit. Only industrial extension cords with proper wire size should be used; size 16/3 wire for distance up to 25 feet, and size 14/3 for distance up to 50 feet.

International

Use a designated 16 amp AC circuit. Only industrial extension cords with proper wire size (2.5 sq. mm) shall be used. Make sure there is a proper electrical wall outlet located within reach of the cord and plug attached to the press.

Place the press in an area that allows for “swing clearance” of the lower platen plus vertical and horizontal clearance of the press itself.

Limited Machine Warranty

Proluxe warrants this dough press machine, when operated under normal conditions, to be free from manufacturing defects in material and workmanship for a period of one year on parts and labor from the invoice date.

This warranty will be effective only when Proluxe authorizes the original purchaser to return the product to the factory in Perris, California freight prepaid and only when the product, upon examination, has proven to be defective. This warranty does not apply to any machine that has been subjected to misuse, negligence or accident. Proluxe shall not be liable for the injury, loss or damage, direct or consequential, arising out of the use or the inability to use the product. No claim of any kind shall be greater in amount than the sale price of the product or part to which claim is made.

This warranty given by the company, it is in lieu of any other warranties, expressed or implied, in law or in fact, including the warranties of merchantability and fitness for a particular use, and is accepted such by the purchaser in taking delivery of this product.

SPECIFICATIONS

Electrical:

120V/50-60Hz/1450W/12.5Amps/AC

Also available; specify when ordering:

Other options available:

- Voltage: 120/208/240
- Amps: 12.5/11.1/16.5
- Watts: 1500/2300/1500

Includes: 72" cord and NEMA approved plug.

Shipping Weight:

200lbs. (91kg.) - DP1350

Poids d'expédition:

200lbs. (91kg.) - DP1350

SAFETY SUMMARY

Warning

To reduce the risk of electrical shock, do not remove or open cover. No user-serviceable parts inside. Refer servicing to qualified personnel.

Avertissement

Pour réduire le risque de choc électrique, ne pas retirer ou couvercle ouvert Aucune pièce réparable par l'utilisateur, reportez-vous à du personnel qualifié.

Warning

In case of power cord damage, do not attempt to repair or replace the power cord. Please contact the manufacturer or the local distributor.

Avertissement

Pour une protection continue contre l'incendie et de choc électrique, remplacer avec le même type et calibre du fusible. Mis fusible supplémentaire nominale max 3A, 120 Vac.

Warning

For continued protection against fire and electric shock, replace with the same type and rating fuse. Listed Supplemental Fuse rated max 3A, 120Vac.

Avertissement

Pour une protection continue contre l'incendie et de choc électrique, remplacer avec le même type et calibre du fusible. Mis fusible supplémentaire nominale max 3A, 120 Vac.

Caution Hot

Avoid touching hot surfaces while operating the machine.

Attention à chaud

Évitez de toucher les surfaces chaudes lorsque vous utilisez la machine.

Caution

When servicing or cleaning the machine, make sure that the power cord is removed from the wall socket.

During normal operation, the base of the machine must be installed or placed above the wall socket.

Avertissement

Lors de l'entretien ou du nettoyage de la machine, assurez-vous que le cordon d'alimentation est débranché de la prise murale.

OPERATION TEMPERATURE & TIMER CONTROL

FIG. A

Solid State Controller

This controller has three (3) control features:

1. Temperature – May be set from 100°-425°F (38°-163°C)
2. Time – Time may be set from 1 second to 10 minutes.
3. Counter – Cycle counter counts the number of applications from 1 to 9999 (see additional Notes – Counter).
4. “2 Lower” (Fig. A) Refers to models using upper and lower heated surfaces.

Controller Operation

1. Viewing the Modes of Operation:

To view the set points of temperature, timer, and counter, press MODE button to view the desired mode of operation.

2. Changing Temperature:

Press MODE button until the temperature is displayed.

Press and hold SET button while pressing the UP (↑) and DOWN (↓) arrow buttons to the desired temperature setting.

3. Changing Time:

Press MODE button until the time is displayed.

Press and hold SET button while pressing the UP (↑) and DOWN (↓) arrow buttons to desired timer setting.

4. Resetting the Counter:

Press MODE button until the counter is displayed.

To reset the counter (# of cycles), simultaneously push UP (↑) or DOWN (↓) arrow buttons (approx. 5 seconds).

Pressing Dough:

1. For best results, your dough should be proofed before pressing, but it will also press directly out of your refrigerator. Flour is not required to press a crust and **should not** be dusted on any part of the machine.

2. Press the On/Off button.

Note: Initial temperature setting of 150°F has been shown to be acceptable for most dough formulations; however, you may have to determine the best temperature for your own dough by trial and error testing of your product at different temperature settings.

3. Set the timer in accordance with company settings.

*Remember that the timer does not actuate until the upper platen mates with the lower platen and resistance is felt.

4. Swing open the lower platen and apply a quick spray food release on the lower platen.

5. Place your dough in the center of the lower platen.

6. Close the platen and, with both hands, press the two green buttons on each side of the machine simultaneously.

7. Hold the buttons until resistance is felt then release at once. The timer will actuate and, when the time cycle is completed, the upper platen will rise automatically (timer is preset at the factory for six seconds, but this is easily changed by following the upcoming instructions.)

8. Remove the crust, place on a pan or peel, add toppings and bake.

RECOMMENDED SEASONING & CLEANING PROCEDURES

Before use, you must properly season your platens to prevent your dough from sticking.

Tools Required:

- Food release
- Soapy water solution
- Washcloth
- Paper towels

DO NOT use steel wool or harsh abrasives, it will you will cause costly damage.

1. Before cleaning make sure the unit is turned off.
2. Spray lower platen with approved food release/oil spray.
3. Wipe excess oil across upper and lower platens.
4. Mix a warm dish soap and water solution.
5. Wipe lower and upper platen clean with a damp cloth.

PREVENTATIVE MAINTENANCE

For a long lifespan, the following preventative maintenance should be followed:

Daily Care:

1. Platens: Turn your machine off and allow it to cool down before attempting to clean. These platens should only be cleaned with mild soap and warm water then wiped off with a clean, soft cloth or soft sponge.

2. Exterior surfaces: Wipe daily with mild soap and warm water will do the job quite nicely.

Service Problems:

Contact our factory at (800) 624-6717 (U.S. only) or an approved service agency. When contacting the factory for information, parts or service instructions, please provide the serial number of the machine be provided. This number can be found on the serial plate located on the rear of the machine.

Refilling hydraulic oil:

Recommended ISO/AW46 Hydraulic oil

Capacity of Reservoir is 650 ml

Remove threaded breather, fill 200 ml at a time and add as desired. Replace threaded breather.

Troubleshoot Guide - Model #: DP1350

Problem	Cause	Action	Ref #
Power button on digital controller face is depressed but doesn't turn on.	1. Power cord is not plugged in.	1. Plug the power cord into wall receptacle and power button.	60
	2. Circuit breaker is tripped off in the site's breaker box.	2. Reset circuit breaker that the grill is plugged into. Depress power button to turn on.	-----
	3. Transformer has taken an electrical surge and is damaged.	3. Replace Transformer after you check secondary side of transformer. If working properly, you should receive 12vdc.	66
	4. Check voltage on the secondary side of the transformer. If you read 12VDC then you are receiving voltage to the controller.	4. Replace controller. Controller should be on once the power button is depressed.	76
	5. Possible blown fuse.	5. Replace fuse.	39
Digital controller's LED's are scrambled or randomly erratic. If when turning on, the display will first go to segment check	1. Possibly a component on the Digital controller is damaged.	Replace digital controller.	-----
	2. Control needs to reset.	While unit is on unplug unit, wait for 1 min. Then plug machine on again and depress power button.	76
Digital controller on startup goes through	The relay driver on the digital control may be blown.	Replace digital controller.	76

LED segment check (8888) then to version # and then loops back to the above reboot.			
Digital display shows PROB. No heat on upper platen.	Sensor lost it's continuity as shown on a multi-meter.	Disconnect prob that is open (no continuity as shown on a multi-meter. Must replace sensor (RTD). Do not cut and splice new sensor. Install new 2000 ohm RTD sensor to under side of heat platen and reconnect to the controller.	A1.10
When depressing the tactile button on digital controller, nothing happens.	The tactile buttons under the overlay may be not close enough to activate. Same goes if the buttons are already pressed by overlay without depressing button.	Carefully tighten the nuts on the back of the controller until button activate. Same goes in reverse if buttons are held down by the overlay.	----
Press does not close when pressing the two, green, start buttons	1. Did not simultaneously press the start buttons exactly at the same time. 2. The lower platen switch mounted on the base is not in contact to complete circuit.	Try pressing both buttons exactly at the same time. This is a safety feature. 2. Make sure the roller plunger comes into contact (clicking noise). This is also a safety feature that both platens are aligned.	82
Digital display shows relay and particular zone is overheating.	1. The relay on the switched side is not opening to regulate temperature.	1. Replace the relay.	92
Beeper not functioning	1. Beeper on digital control board failed.	1. Replace digital controller board.	76
If setpoint is reached but slightly off in temperature.	Offset may need to be calibrated and adjusted.	Call (800) 624-6717 ext. 129 for instructions.	
Heater platen overheating	If the relay (depending on the year of the model) on the coil side are receiving 12vdc indicates the controller is functioning properly. On the switching side of the relay, is there 120 vac going to the heater in question. If there is no voltage on the to the switching side of the relay to the heaters, the relay is not	Replace relay If the controller's heat-on LED is not lit indicating the controller is working properly.	55

	working properly.		
Both upper and lower platen not aligned when activating. You may experience a shifting of the platens when coming into contact, or striking noise.	Upper and lower platen are misaligned.	On the left side of the post collar (#35) are back-to-back set screws. Remove the first locking set screw. Adjust stopping set screw to align platen *IMPORTANT* must reduce air pressure to a minimum as not to damaging closing platens. After alignment is complete, re-install locking set screw as not to move the alignment set screw.	17
Dough is not a consistent thickness.	Adjust upper platen for level press	Underneath the housing there is 4 stacked hex bolts sitting over the upper platen attached to the arm. The top bolts are called locking bolts. The 4 larger hex bolts below are adjustment bolts. Break free the 4 locking bolts. With an open end wrench adjust the bolts (1/8 turn at a time). After testing, tighten the locking bolts making sure not to move the larger adjustment bolts.	11 And 12

Warranty & Return Policy

Proluxe warrants all products manufactured by it against defects in workmanship or materials from the date of purchase for a period of 1 year on parts and labor. This warranty applies to only equipment purchased and used in the United States.

Warranty period shall begin when equipment ships. Warranty travel will only be covered for 60 miles.

ALL WARRANTY SERVICE CALLS MUST BE APPROVED BY PROLUXE. IF THIS PROCEDURE IS NOT FOLLOWED, WARRANTY SERVICE WILL NOT BE COVERED. WARRANTY SERVICE WILL BE PAID ON STRAIGHT TIME, OVERTIME WILL NOT BE COVERED.

EXCLUSIONS

Special Order Equipment and Accessories

Cannot be canceled and are not returnable unless defective within the terms of this warranty.

In no event shall Proluxe be liable for consequential damages arising out of the failure of any of its products if operated improperly or caused by normal wear or damaged by operator abuse.

Limited Lifetime Warranty on Heating Elements

If a replacement is needed, Proluxe will send the new part at no charge but labor will not

be covered unless the unit is still under the 1 year manufacturer warranty.

RETURNED MERCHANDISE POLICY

Should it become necessary to return any of the company's products, the following instructions must be adhered to: First, contact our customer service department for approval and a return authorization number. Please have the serial number of your item available at that time. All merchandise must be shipped freight prepaid by customer or service agency. Subject to the inspection of the product by the company, a restocking charge of 20% of the Net purchased price paid to Proluxe will be assessed. Merchandise may not be returned for credit without prior written approval of Proluxe.

Collect shipments will not be accepted. No returns after 60 days of original shipment date on machines. Purchased parts may not be returned after 30 days. If upon inspection by Proluxe or its authorized agent it is determined the equipment has not been used in an appropriate manner, has been modified, or has not been properly maintained, or has been subject to misuse, misapplication, neglect, abuse, accident, unauthorized modification, damage during transit, delivery, fire, flood, act or war, riot or act of God, then this warranty shall be deemed null and void.

TERMS & CONDITIONS

1. Price List prices are suggested retail prices and are shown in U.S. Dollars.

2. Terms of Payment: 1% 10 days, NET 30 days.

3. New Accounts: Satisfactory credit information must be provided before open account status can be extended.

Unless agreed otherwise, all shipments will be made C.O.D., Cash in advance.

4. Pricing: Prices, specifications, model numbers, capacities and accessories are subject to change without notice.

5. Freight/Routing: Method of shipment will be determined by Proluxe unless otherwise advised by purchaser.

6. Damaged Claims: All merchandise shipped at purchaser's risk. Inspection must be made by purchaser at time goods are received. If goods are damaged, the PURCHASER shall request that the agent of the transportation company make a written notation on the

proper shipping documents immediately and then file a claim for damages.

Note: Goods damaged in shipping are non-returnable.

7. Returns: Machines may not be returned after 60 days. Purchased parts may not be returned after 30 days. A restocking fee of 20% will be assessed on non-warranty returns.

8. Taxes: Prices indicated herein DO NOT include State, Federal, Local or foreign taxes or duties, nor do they include fees, permits, insurance or other levies, all of which are the responsibility of the purchaser.

9. All orders are subject to acceptance by Proluxe.

10. Possession of this price list shall not be considered an offer to sell.
