Commercial Refrigerated Chef Base Manual

Refrigerated Chef Base Units
178CBE36HC, 178CBE48HC, 178CBE52HC, 178CBE60HC, 178CBE72HC, 178CBE84HC

Please read the manual thoroughly prior to equipment set-up, operation and maintenance.
Warning

DANGER – RISK OF FIRE OR EXPLOSION. FLAMMABLE REFRIGERANT USED. TO BE REPAIRED ONLY BY TRAINED SERVICE PERSONNEL. DO NOT PUNCTURE REFRIGERANT TUBING.

PELIGRO - RIESGO DE INCENDIO O EXPLOSION. REFRIGERANTE INFLAMABLE UTILIZADO. PARA SER REPARADO SOLAMENTE POR PERSONAL DE SERVICIO CALIFICADO. NO PINCHAR LA TUBERÍA REFRIGERANTE.

DANGER – RISQUE DE FEU OU D’EXPLOSION. LE FRIGORIGÈNE EST INFLAMMABLE. CONFIER LES RÉPARATIONS À UN TECHNICIEN SPÉCIALISÉ. NE PAS PERFORER LA TUBULURE CONTENANT LE FRIGORIGÈNE.

CAUTION – RISK OF FIRE OR EXPLOSION. FLAMMABLE REFRIGERANT USED. CONSULT REPAIR MANUAL/OWNER’S GUIDE BEFORE ATTEMPTING TO SERVICE THIS PRODUCT. ALL SAFETY PRECAUTIONS MUST BE FOLLOWED.

ATENCION - RIESGO DE INCENDIO O EXPLOSIÓN. REFRIGERANTE INFLAMABLE UTILIZADO. CONSULTE EL MANUAL DE REPARACIÓN / GUÍA DEL PROPIETARIO ANTES DE INTENTAR DAR SERVICIO A ESTE PRODUCTO. DEBEN CUMPLIR CON TODAS LAS PRECAUCIONES DE SEGURIDAD.

ATTENTION – RISQUE DE FEU OU D’EXPLOSION. LE FRIGORIGÈNE EST INFLAMMABLE. CONSULTER LE MANUEL DU PROPRÉTAIRE/GUIDE DE RÉPARATION AVANT DE TENTER UNE RÉPARATION. TOUTES LES MESURES DE SÉCURITÉ DOIVENT ÊTRE RESPECTÉES.

CAUTION – RISK OF FIRE OR EXPLOSION DUE TO PUNCTURE OF REFRIGERANT TUBING; FOLLOW HANDLING INSTRUCTIONS CAREFULLY. FLAMMABLE REFRIGERANT USED.

ATENCION - RIESGO DE INCENDIO O EXPLOSIÓN DEBIDO A LA PERFORACION DE LA TUBERÍA REFRIGERANTE; SIGA LAS INSTRUCCIONES DE MANIPULACIÓN CON CUIDADO. REFRIGERANTE INFLAMABLE UTILIZADO.

ATTENTION – RISQUE DE FEU OU D’EXPLOSION SI LA TUBULURE CONTENTANT LE FRIGORIGÈNE EST PERFORÉE; SUIVRE LES INSTRUCTIONS DE MANUTENTION AVEC SOIN. LE FRIGORIGÈNE EST INFLAMMABLE.

CAUTION – RISK OF FIRE OR EXPLOSION DUE TO FLAMMABLE REFRIGERANT USED. FOLLOW HANDLING INSTRUCTIONS CAREFULLY IN COMPLIANCE WITH LOCAL GOVERNMENT REGULATIONS.

ATENCIÓN – RIESGO DE INCENDIO O EXPLOSIÓN DEBIDO A REFRIGERANTE INFLAMABLE UTILIZADO. SIGA LAS INSTRUCCIONES DE MANIPULACIÓN CON CUIDADO CONFORME A LAS REGLAS DE LA MUNICIPALIDAD.

ATTENTION – RISQUE DE FEU OU D’EXPLOSION SI LE FRIGORIGÈNE EST INFLAMMABLE. SUIVRE LES INSTRUCTIONS DE MANUTENTION AVEC SOIN CONFORMÉMENT AUX RÈGLEMENTATION GOUVERNEMENTALE LOCAUX.
Installation

*Important!!! Please Read Before Installation*

- If the unit has recently been transported on its side, please let unit stand still for a minimum of 24 hours before plugging it in.
- Make sure that the unit drops down to desired temperature before loading the unit with product.
- Make sure that there is proper ventilation around the unit in the area where it will operate.
- Make sure all accessories are installed (i.e., divider bars, casters) before plugging the unit in.
- Please read through the manual in its entirety.

*Cabinet Location Guidelines*

- Install the unit on strong and leveled surfaces
  - Unit may be noisy if surface is uneven.
  - Unit may malfunction if surface is uneven.
- Install the unit in an indoor, well-ventilated area
  - Unit performs more efficiently in a well-ventilated area.
  - For best performance, please maintain clearance of 4” on the front and sides of the unit.
  - Outdoor use may cause decreased efficiency and damage to the unit.
- Avoid installation in a high humidity and/or dusty area
  - Humidity could cause unit to rust and decrease efficiency of the unit.
  - Dust collected on condenser coil will cause unit to malfunction.
  - Malfunction due to dirty condenser will void warranty.
- Select a location away from heat and moisture-generating equipment
  - High ambient temperatures will cause the compressor to overwork, leading to higher energy bills and gradual breakdown of the unit. The unit should not be used in areas over 90 degrees.
  - Malfunction due to high ambient temperature will void warranty.
  - Equipment placed on top of the unit must be installed on manufacturer-supplied legs. Minimum clearance of 4” between the top of the chef base and bottom of the cooking equipment.

*Electrical*

- Please ensure that the required voltage of the compressor is being supplied at all times. Low or high voltage can detrimentally affect the refrigeration unit.
- All units should be plugged into a grounded and properly-sized electrical outlet with appropriate overcurrent protection. Please refer to the electrical requirements on the nameplate.
- Please make sure that your unit has its own dedicated outlet.
- Do not use an extension cord.
Temperature Controls
• Refrigerant LED - Compressor is on
• Fan LED - Fan is on
• Defrost LED - Defrost cycle is running

Functions

Adjusting the Temperature

Your new refrigerator or freezer is already factory-set to run at optimum temperatures for food safety and should require no adjustments.

Refrigerators are set to cycle between a minimum temperature of 33 degrees Fahrenheit and a maximum temperature of 40 degrees Fahrenheit.

Freezers are set to cycle between a minimum temperature of -5 degrees Fahrenheit and a maximum temperature of 2 degrees Fahrenheit.

Adjusting the temperature changes the minimum temperature your unit will run at. Your unit will not run constantly at this setting. To change it, follow these instructions:

Digital Control Units
• Hold “SET” for 1 sec. The display will flash the current minimum temperature.
• Use the arrow buttons to adjust the minimum temperature you want it to run at.
• Press “SET” again to save your settings

Always remember to calculate the differential if you change the minimum temperature setting. The cabinet temperature will fluctuate up to +7 degrees over your set minimum temperature as the compressor runs and shuts off. Setting the temperature too high will result in unsafe maximum temperatures and possible health code violations.
Running a Manual Defrost Cycle

This unit is pre-programmed to run automatic defrost cycles at preset intervals. However, if you would like to run a manual defrost cycle at any time, please follow the steps below:

**Refrigerators**: Press the defrost button (snowflake symbol and down arrow) for approximately 3 seconds. Repeat to stop the defrost cycle.

**Defrost Systems**

Refrigerator coils are kept below the freezing point (32° F). During compressor down-time, the evaporator fan continues to circulate air through the evaporator coil. This air circulation raises the coil temperature above the freezing point, melting any accumulated frost. Run-off water is drained into the evaporator pan and evaporated. Automatic defrost timers automatically initiate at pre-set intervals and for a pre-determined duration.

**Loading Food Pans**

Chef bases are designed to hold 4” deep food pans. Using the included divider bars, configure each drawer to best meet specific service needs. Each drawer can hold a combination of full, 1/3, 1/6 or 1/9 pans as needed.

Safety / Warning

Please pay close attention to the safety notices in this section. Disregarding these notices may lead to serious injury and/or damage to the unit.

**Attention**
- To minimize shock and fire hazards, be sure not to overload outlet. Please designate one outlet for your unit.
- Do not use extension cords.
- Do not put your hands under the unit while it is being moved.
- When the unit is not in use for a long period of time, please unplug the unit from the outlet.
- After unplugging the unit, wait at least 10 minutes before plugging it back in. Failure to do so could cause damage to the compressor.

**Unplug Cord**
- To minimize shock and fire hazards, please do not plug or unplug the cord with wet hands.
- During maintenance and cleaning, please unplug the unit.

**Proper Grounding Required**
- To minimize shock and fire hazards, make sure that the unit is properly grounded.

**Warning**
- Do not attempt to remove or repair any component unless instructed by factory.
- Make sure that the unit is not resting on or against the electrical cord and plug.
- To minimize personal injury, do not hang on the drawers.
- Do not store any flammable and explosive gas or liquids inside the unit.
- Do not attempt to alter or tamper with the electrical cord.
Regular Maintenance

WARNING: DISCONNECT POWER CORD BEFORE CLEANING ANY PARTS OF THE UNIT.

Cleaning The Condenser Coil

• For efficient operation, it is important that the condenser surface be kept free of dust, dirt, and lint.
• We recommend cleaning the condenser coil and fins at least once per month.
• Clean with a commercial condenser coil cleaner, available from any kitchen equipment retailer. Brush the condenser fins from top to bottom, not side to side.
• After cleaning, straighten any bent condenser fins with a fin comb.

Cleaning The Fan Blades and Motor

If necessary, clean the fan blades and motor with a soft cloth. If it is necessary to wash the fan blades, cover the fan motor to prevent moisture damage.

Cleaning The Interior of Unit

• When cleaning the cabinet interior, use a solvent of warm water and mild soap.
• Do not use steel wool, caustic soap, abrasive cleaners, or bleach that may damage the stainless steel surface.
• Wash drawer gaskets on a regular basis, preferably weekly. Simply remove drawer gasket from the frame of the door, soak in warm water and soap for thirty (30) minutes, dry with soft cloth, and replace.
• Check drawer gaskets for proper seal after they are replaced.
• Periodically remove the drawer divider bars from the unit and clean them with mild soap and warm water.
# Troubleshooting

## Compressor Not Running

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fuse blown or circuit breaker tripped.</td>
<td>Replace fuse or reset circuit breaker.</td>
</tr>
<tr>
<td>Power cord unplugged.</td>
<td>Plug in power cord.</td>
</tr>
<tr>
<td>Thermostat set too high.</td>
<td>Set thermostat to lower temperature.</td>
</tr>
<tr>
<td>Cabinet in defrost cycle.</td>
<td>Wait for defrost cycle to finish.</td>
</tr>
</tbody>
</table>

## Condensing Units Run For Long Periods of Time.

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excessive amount of warm product placed in cabinet.</td>
<td>Allow adequate time for product to cool down.</td>
</tr>
<tr>
<td>Prolonged drawer opening or drawer ajar.</td>
<td>Ensure drawers are closed when not in use. Avoid opening drawers for long periods of time.</td>
</tr>
<tr>
<td>Drawer gasket(s) not sealing properly.</td>
<td>Ensure gaskets are snapped in completely. Remove gasket and wash with soap and water. Check condition of gasket and replace if necessary.</td>
</tr>
<tr>
<td>Dirty condenser coil.</td>
<td>Clean the condenser coil.</td>
</tr>
<tr>
<td>Evaporator coil iced over.</td>
<td>Unplug unit and allow coil to defrost. Make sure thermostat is not set too cold. Ensure that door gasket(s) are sealing properly.</td>
</tr>
</tbody>
</table>

## Cabinet Temperature is too Warm.

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thermostat set too warm.</td>
<td>Set thermostat to lower temperature.</td>
</tr>
<tr>
<td>Airflow blocked.</td>
<td>Re-arrange product to allow for proper air flow. Make sure there is at least four inches of clearance from evaporator.</td>
</tr>
<tr>
<td>Excessive amount of warm product placed in cabinet.</td>
<td>Allow adequate time for product to cool down.</td>
</tr>
<tr>
<td>Fuse blown or circuit breaker tripped.</td>
<td>Replace fuse or reset circuit breaker.</td>
</tr>
<tr>
<td>Dirty condenser coil.</td>
<td>Clean the condenser coil.</td>
</tr>
<tr>
<td>Evaporator coil iced over.</td>
<td>Ensure drawers are closed when not in use. Avoid opening drawers for long periods of time.</td>
</tr>

Warranty Information
Limited Service Warranty - Valid only in the United States - 10/2020

3 Year Parts and Labor Warranty
Unless otherwise stated, Avantco Refrigeration warrants to the original purchaser of new Avantco Refrigeration units, that such equipment will be free from defects in material and workmanship for a period of 3 years from the original date of delivery. Valid only in the Contiguous United States. The 3 year parts and labor warranty applies only to the following series: Z-Series, ZPT, ZUC, ZWT

2 Year Parts and Labor Warranty
Unless otherwise stated, Avantco Refrigeration warrants to the original purchaser of new Avantco Refrigeration units, that such equipment will be free from defects in material and workmanship for a period of 2 years from the original date of delivery. Valid only in the Contiguous United States. The 2 year parts and labor warranty applies to only the following series: CPSS, SSPPT, SS-Series, SSPT, SSCFT, SSUC, SSUD, SSWD, SSWT

1 Year Parts and Labor Warranty
Unless otherwise stated, Avantco Refrigeration warrants to the original purchaser of new Avantco Refrigeration units, that such equipment will be free from defects in material and workmanship for a period of 1 year from the original date of delivery. Valid only in the Contiguous United States. The 1 year parts and labor warranty applies to only the following series: APPT, APT, A-Series, AU, AWT, BC, BCD, BCR, CAC, CBE, CPW, GD4C, GDC, GDICE, GDS, GDW, HAC, MC, MCAC, MAC, VAC, UWD

In addition, the 2 year warranty applies to items of the following series sold with stainless steel exteriors only: GF, HBB, UBB, UDD, DLC, UWD

5 Year Compressor Warranty
In addition to the applicable parts and labor warranty above, Avantco Refrigeration warrant the compressor part only on all named series above to be free of defects in material and workmanship for a period of 5 years from the original date of delivery.

What This Warranty Does Not Cover:
Avantco Refrigeration will not warrant coverage for component failure or other damages that arise under the following conditions:
• Failure to install and/or use the unit within proper operating conditions specified by Avantco Refrigeration. This includes installation in any and all outdoor or mobile applications.
• Failure to properly maintain the unit. This includes, but is not limited to, basic preventative maintenance like cleaning the condenser coil.
• Installation in non-commercial or residential applications. Because Avantco is a commercial brand intended to be installed in a commercial setting, units installed in a residence are not covered under warranty. Contact your authorized dealer for assistance.
• Products sold or used outside of the Contiguous United States.
• Any damage that occurs as a result of negligence or improper handling.
• Overloading or improper loading of the unit in a manner that prevents proper airflow.
• Wireless monitoring hardware installed by an authorized dealer.
Warranty Information
Limited Service Warranty - Valid only in the United States - 10/2020

Additionally, no claims can be made against this warranty for spoilage of products, loss of sales or profits, or any other consequential damages. Normal wear type parts, such as light bulbs and gaskets, are not included in warranty coverage.

For Warranty Inquiries or Service:
This warranty is only valid on equipment purchased from an authorized dealer. A list of authorized dealers for your state can be found by going to www.AvantcoRefrigeration.com

• Call 1-800-678-5517 for service requests and warranty inquiries. Please have the model number, serial number, and order number/proof of purchase to obtain warranty service ready when calling.
• The model and serial number are typically located on the rear or side of the unit, or inside the door on the left-hand side.

Failure to contact Avantco Refrigeration prior to obtaining equipment service may void your warranty.

Food Truck and Outdoor Commercial Use Warranty:
Valid only in the Contiguous United States

Avantco Refrigeration warrants new equipment sold to food trucks and commercial customers that have installed the unit outdoors to be operational upon delivery and proper installation, not to exceed a period of 30 days from the date of delivery. Food Trucks must be located at a permanent address with the unit easily accessible for service. Outdoor use must be covered and installed in a permanent outdoor kitchen, bar, or service area. This warranty does not cover issues caused by a lack of ventilation, overheating, or excessive humidity. Contact your authorized place
