

About Awntech

Awntech is a made-to-order company that specializes in quick and thorough production of fully assembled patio retractable awnings and modular window awnings and door awnings.

Our awnings are designed for not only contractors and installers, it is specifically designed for the Do-It-Yourself person. We wanted to allow customers to minimize any contractor or installer costs by making the ordering, delivery, and installation process as seamless as possible.

Each awning is individually hand crafted in Euless, TX. The awnings can be shipped directly to a customers door or shipped to the retailers and dealers stores. An Awntech awning has high quality materials that can be used for residential and commercial projects. The materials are commercial grade aluminum, steel, and 100% acrylic fabric.

Bahama

Shutter Style Metal Awning

The <u>Bahama awning</u> is a shutter style <u>aluminum awning</u> applicable for doors, windows, and entryways. This awning is perfect for any <u>residential</u> <u>home</u> or <u>commercial buildings</u>. Its modular design makes assembly and installation seamless for any professional installer, contractor, or anyone looking to do a DIY (Do-It-Yourself) project.

The awning is individually hand-crafted and durable. The framework is constructed out of a powder-coated aluminum and assembled with stainless steel hardware. The powder-coated finishes are available in black, bronze, copper, and pewter. The finish is treated with resistant coatings that keep the <u>awning</u> water resistant, fade resistant, and prevent mildew and soil build up. The awnings material and structure can withstand harsh winds, heavy rain, snow, and is even perfect for high humidity climates.

Assembling this <u>fixed awning</u> is simple with its step-by-step manual and can be installed on many different surfaces types such as brick, stucco, wood, stone and other surfaces.

Houstonian

Measuring Guide

PLEASE NOTE: For Houstonian widths 5' through 8' ONLY (does not apply to widths 3' or 4'), an additional middle support is included in the kit. This middle support is meant to run perpendicular from the wall and can therefore make it difficult or impossible to install around a window/door. Please refer to page 17 in the 5' through 8' width Houstonian owner's manual for more information.

Please note that the (q) Middle Support <u>is not required and is only a recommendation</u> to provide additional structural support to the middle of the awning. Customers who wish to install this unit around the perimeter of a window/door frame can do so by eliminating the (q) Middle Support.

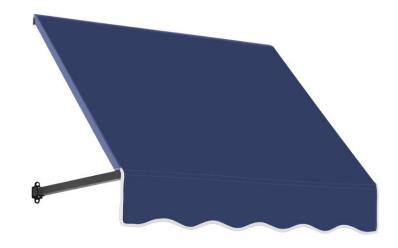

Dallas Retro

Open-Sided Slope Fixed Awning

The Awntech Dallas Retro is our open-sided slope fixed fabric awning applicable for doors, windows, and entryways. This awning adds a modern aesthetic to any residential home or commercial building. Its modular design makes assembly and installation seamless for any professional installer, contractor, or anyone looking to do a DIY (Do-It-Yourself) project.

The awning is patented, individually hand-crafted, and durable. The framework is constructed out of a durable mill finish aluminum and assembled with stainless steel hardware. The projection arms are made of commercial grade black anodized aluminum. The canopy is a Beauty-Mark branded 100% solution-dyed acrylic fabric with anti-microbial yarns. Each fabric is treated with resistant coatings that make the fabric water resistant, block harsh UV rays from causing quick fading, and prevent mildew and soil build up. The awning fabric canopy includes a wavy scallop (known as Awntech's standard Sahara valance) with a braided trim to enhance the front end of the awning.

The Dallas Retro awning is offered in a wide variety of solid and stripe colors. The awnings material and structure can withstand harsh winds, heavy rain, snow, and is even perfect for high humidity climates. Assembling this fixed awning is simple with it's step-by-step manual and can be installed on many different surfaces types such as brick, stucco, wood, stone and other surfaces.

New Yorker

Rigid Valance Fixed Awning

The Awntech New Yorker is our rigid valance fixed fabric awning applicable for doors, windows, and entryways. This awning adds a modern aesthetic to any residential home or commercial building. Its modular design makes assembly and installation seamless for any professional installer, contractor, or anyone looking to do a DIY (Do-It-Yourself) project.

The awning is patented, individually hand-crafted, and durable. The framework is constructed out of a durable mill finish aluminum and assembled with stainless steel hardware. The awning is closed on both sides and replaces the traditional free flowing scalloped valance with a frame supported valance. The canopy is a Beauty-Mark branded 100% solution-dyed acrylic fabric with anti-microbial yarns. Each fabric is treated with resistant coatings that make the fabric water resistant, block harsh UV rays from causing quick fading, and prevent mildew and soil build up. The awning fabric canopy includes a wavy scallop (known as Awntech's standard Sahara valance) with a braided trim to enhance the front end of the awning.

The New Yorker awning is offered in a wide variety of solid and stripe colors. The awnings material and structure can withstand harsh winds, heavy rain, snow, and is even perfect for high humidity climates. Assembling this fixed awning is simple with our step-by-step manual and can be installed on many different surfaces types such as brick, stucco, wood, stone and other surfaces.

New Orleans

Spear Arm Fixed Awning with Crescent Slope

The Awntech New Orleans is our spear arm fixed fabric awning applicable for doors, windows, and entryways. This awning is perfect for the ornate style residential home or commercial building. Its modular design makes assembly and installation seamless for any professional installer, contractor, or anyone looking to do a DIY (Do-It-Yourself) project.

The awning is patented, individually hand-crafted, and durable. The framework is constructed out of a durable mill finish aluminum and assembled with stainless steel hardware. The projection arms are a commercial grade iron that is painted in black and has pointed spear-shaped end caps.

The canopy is a Beauty-Mark branded 100% solution-dyed acrylic fabric with antimicrobial yarns. Each fabric is treated with resistant coatings that make the fabric water resistant, block harsh UV rays from causing quick fading, and prevent mildew and soil build up. The awning fabric canopy includes a wavy scallop (known as Awntech's standard Sahara valance) with a braided trim to enhance the front end of the awning.

The New Orleans awning is offered in a wide variety of solid and stripe colors. The awnings material and structure can withstand harsh winds, heavy rain, snow, and is even perfect for high humidity climates. Assembling this fixed awning is simple with our step-by-step manual and can be installed on many different surfaces types such as brick, stucco, wood, stone and other surfaces.

Santa Fe

Twisted Rope Fixed Awning

The Awntech Santa Fe is our twisted-rope arm fixed fabric awning applicable for doors, windows, and entryways. This awning has a simplistic and graceful appearance for any residential home or commercial building. Its modular design makes assembly and installation seamless for any professional installer, contractor, or anyone looking to do a DIY (Do-It-Yourself) project.

The awning is patented, individually hand-crafted, and durable. The framework is constructed out of a durable mill finish aluminum and assembled with stainless steel hardware. The projection arms are a commercial grade iron that is painted in black and are molded in the shape of a dual-cabled rope. The canopy is a Beauty-Mark branded 100% solution-dyed acrylic fabric with anti-microbial yarns. Each fabric is treated with resistant coatings that make the fabric water resistant, block harsh UV rays from causing quick fading, and prevent mildew and soil build up. The awning fabric canopy includes a wavy scallop (known as Awntech's standard Sahara valance) with a braided trim to enhance the front end of the awning.

The Santa Fe awning is offered in a wide variety of solid and stripe colors. The awnings material and structure can withstand harsh winds, heavy rain, snow, and is even perfect for high humidity climates. Assembling this fixed awning is simple with our step-by-step manual and can be installed on many different surfaces types such as brick, stucco, wood, stone and other surfaces.

Maui

Heavy-Duty Patio Retractable Awning

The Maui awning is our heavy-duty standard patio retractable awning that is fully assembled. It comes in a manual option and motorized option. The framework includes a heavy-duty steel and aluminum white powder-coated frame. It retracts and expands with multi chambered, stainless steel, and dual-cabled lateral projection arms.

The fabric is constructed of Beauty-Mark brand 100% solution-dyed acrylic fabric. Each fabric includes resistant coatings to help prevent fading from the harsh UV sun rays, resist potential soil and mildew build-up, and provide a water resistant barrier to protect the threads from bleeding color* (See disclaimer at the bottom).

Each awning includes a removable 10 inch valance. Installation simply requires mounting of the brackets followed by securing the awning into the brackets. The awning may be installed on many different surface types. The mounting of the brackets is a quick step-by-step process when following our installation manual. Each Awntech awning is designed to be installed by handy people doing a DIY project. Needless to say, this does not exclude contractors or professional installers. Awntech guarantees high quality and ensures that each retractable awning is hand-crafted to have a long-lasting durable design and structure.

^{*} Disclaimer: Water resistant does not mean the retractable awning is waterproof. We recommend that you avoid using a retractable awning in inclement weather. The fabric is tightly woven and can puddle water in the middle of the awning when extended, potentially putting too much pressure on the arms and damaging them. Please review the warranty policy for any clarification.

California

Medium-Duty Patio Retractable Awning

The California awning is our medium-duty standard patio retractable awning. The design and operational use is simple and recognized for its affordability. The retractable is fully assembled and includes a standard manual operation controlled by a rocker arm/hand crank. The awning does not include a cassette or a hood. This was specifically designed for the purpose of showing off the qualities and mechanisms of the awning as it operates. The framework includes a heavy-duty steel and aluminum white powder-coated frame. It retracts and expands with multi chambered, stainless steel, and dual-cabled lateral projection arms.

The fabric is constructed of Beauty-Mark brand 100% solution-dyed acrylic fabric. Each fabric includes resistant coatings to help prevent fading from the harsh UV sun rays, resist potential soil and mildew build-up, and provide a water resistant barrier to protect the threads from bleeding color* (See disclaimer at the bottom).

Each awning includes a removable 10 inch valance. Installation simply requires mounting of the brackets followed by securing the awning into the brackets. The awning may be installed on many different surface types. The mounting of the brackets is a quick step-by-step process when following our installation manual. Each Awntech awning is designed to be installed by handy people doing a DIY project. Needless to say, this does not exclude contractors or professional installers. Awntech guarantees high quality and ensures that each retractable awning is hand-crafted to have a long-lasting durable design and structure.

* Disclaimer: Water resistant does not mean the retractable awning is waterproof. We recommend that you avoid using a retractable awning in inclement weather. The fabric is tightly woven and can puddle water in the middle of the awning when extended, potentially putting too much pressure on the arms and damaging them. Please review the warranty policy for any clarification.

^{**} Offered in three fabric color options: Forest/White, Gray/White, and Tan/White.

^{**} All retractable awnings include a 10" tall removable valance and rocker arm/crank handle

Measuring Guide

Maui, Destin, Hampton, California

- Measure the length of wall space you have available. Then choose from one of our standard widths.
- 10" minimum clearance horizontal mounting space (must be clear space for full length of awning)
- 80" minimum height from floor to bottom of awning (8' is ideal)
- Projection (distance available to you from wall to end of your awning)

Additional info: Valance height- 10"; Valance Standard Style- Sahara; Adjustable Pitch- 0-15 degrees (0"-24" front bar)

Mesa

Manual Window, Small Patio & Balcony Retractable Awning

The Mesa awning is our heavy-duty, small patio and window retractable awning. The design and operational use is unique and it is recognized for its vertical upward folding arms. This retractable is fully assembled (with the exception of installing the arms) and is available in a manual operation. This awning is designed for the purpose of providing shade in areas that are typically too small for our larger retractable models that are offered. Even though it is a retractable awning, their structure is similar to a fixed awning when fully extended. The framework includes a heavy-duty steel and aluminum white powder-coated frame and powder-coated aluminum hood. It retracts and expands with multi chambered, stainless steel, and dual-cabled lateral projection arms.

The fabric is constructed of Beauty-Mark brand 100% solution-dyed acrylic fabric. Each fabric includes resistant coatings to help prevent fading from the harsh UV sun rays, resist potential soil and mildew build-up, and provide a water resistant barrier to protect the threads from bleeding color* (See disclaimer at the bottom).

Each awning includes a removable 10 inch valance. The mounting of the brackets is a quick step-by-step process when following our installation manual. Each Awntech awning is designed to be installed by handy people doing a DIY project. Needless to say, this does not exclude contractors or professional installers. Awntech guarantees high quality and ensures that each retractable awning is hand-crafted to have a long-lasting durable design and structure.

* Disclaimer: Water resistant does not mean the retractable awning is waterproof. We recommend that you avoid using a retractable awning in inclement weather. The fabric is tightly woven and can puddle water in the middle of the awning when extended, potentially putting too much pressure on the arms and damaging them. Please review the warranty policy for any clarification.

Measuring Guide

Mesa

	Α	 0 inch max drop over out-swinging door (for awnings less than 3 feet deep) Exception is for entries with out-swinging doors. The drop is a personal preference. Hint: The greater the drop = more energy savings but less interior light
	В	Total Window/entry width
Please contact sales@awntech.com for the measuring guide for the Mesa. We are currently working on updating	С	• For entries with low overhead clearance (low roof lines) please see items designated "Low Roof Line Entry Awning"
this guide.	D	• Every awning is 4.5" wider than the window/door size it is representing (B). This is for mounting purposes. (example: 3' San Francisco is actually 40.5" wide)
	Е	Height measurements is the same measurement as the projection.
	F	4" minimum mounting space required above window or in-swinging door

Awntech Warranty

Please visit this direct link for warranties for fixed fabric awnings, fixed metal awnings, retractable awnings, and accessorieshttps://awntech.com/contact/product-warranty/

Awning Warranty Overview:

5 year Pro-rated* awning warranty

5 year Pro-rated* fabric warranty

5 year Pro-rated* frame warranty

1 year Pro-rated awning accessories warranty

Awntech Cancellation/Return Policy

You can only return a product without recourse if it is defective upon arrival. If you simply do not like the product, or if you did not measure correctly, you will only be qualified for a merchandise credit and you will be required to pay for shipping the product back to Awntech in re-stock condition. There will be a 25% restock fee applicable once your goods have shipped. Customers have up to 30 days from delivery to return their product, otherwise they will qualify only for warranty replacements, subject to the restrictions set forth herein. Customized awnings (dimensions outside of Awntech's standard offerings) and fixed awnings over 10ft wide cannot be returned and will qualify only for warranty replacements, subject to the restrictions set forth herein.

Customers have 24 hours after placing their order to request an order cancellation, otherwise a 10% order cancellation fee will be applied. As stated in our return policy, if the order is cancelled after the order has shipped, a 25% restock fee will be applied.

*Fixed Awnings over 10ft wide are non-refundable
