

Stylish & Versatile Solutions for Effortless Waste Management

NEW
COMING SOON IN
OCTOBER 2024*

MULTI-STREAM & SINGLE-STREAM SET-UPS DONE YOUR WAY

Introducing the next evolution in waste management solutions. New small and large capacity receptacles are modular in design, making it easier than ever to configure the perfect space-saving multi-stream setups for diverse needs. Our new design of waste receptacles help reduce contamination and enhance the customer experience by offering unique sizes, lid openings, lid colors, decals and panel for identifying each stream. You can even personalize your panel or decals for an elevated branded look!

With narrow and shallow 30-gallon and standard 55-gallon options, our new receptacles offer versatility in both multi-stream and single-stream setups. Mix and match the perfect size units for each unique space or choose from pre-configured multi-stream variations for effortless ordering.

*Final design is in development

A STYLISH LOOK FOR CUSTOMERS THAT IS EFFICIENT FOR STAFF

New, stylish and efficient trash, recycling and compost receptacles elevate waste management for both staff and customers. Large capacity units offer ergonomic doors for easy emptying. Small capacity units, available in a narrow or shallow design, are perfect for small or tight spaces. With convenient stream indicators, customers can quickly and easily find the receptacle they need, **all leading to improved user experience, increased productivity and labor savings.**

NEW RECEPTACLES OFFER:

Modular styles form multi-stream set-ups that maximize space efficiency and can be configured as needs and spaces change

Ergonomic design on the large capacity unit offers hinged door opening for safe, simplified and less frequent emptying

Improved liner design is standard in all sizes, with updated features to allow for clean, hassle-free bag changes

Indoor/outdoor lid styles with colors and openings that coordinate to each stream for effortless identification and use

Decals & styrene panel included with each unit to accurately and easily communicate different streams. **Personalize panel or decals to strengthen your brand or message!**

Durable & heavy duty receptacles are made from polyethylene to resist harsh weather, UV rays and graffiti
