CARING FOR YOUR BURRITOS

STORAGE & HEATING

REFRIGERATED STORAGE

Refrigerated/thawed burritos must be stored under 40°F, and have a 10-day shelf life from completed thaw.

FROZEN STORAGE

Frozen burritos must be stored at or below 10°F, and have a shelf life of up to 1 year from birth.

TRES VERDE SAUCE

Tres Verde Sauce is shelf-stable but should be refrigerated after opening and used within 10–14 days.

DIS IS IMPORTANT

FROZEN DELIVERY CONFIRMATION INSTRUCTIONS

- 01** Check burrito temps immediately upon delivery and place in the fridge or freezer.
- 02** Do not refreeze thawed product. Do not sell or eat any product that arrives above 41°F.
- 03** Scan the QR code on the provided postcard (or visit disburrito.com/frozen-confirmation) to confirm if burritos arrived frozen.

TO QUALIFY FOR A CREDIT/RESHIPMENT: Temperatures must be submitted within 24 hours via the above. Late or incorrectly submitted reports will not be accepted.

THAWING DIRECTIONS

Please note times are dependent upon air circulation and temp of your fridge or cooler. See Weekly Thawing Guide for more info.

OPTION 1 - OUT OF BOX:
Place burritos on fridge shelf or sheet tray, spaced to allow for air circulation. Thaw for roughly 24 hours, depending on fridge's air flow.

OPTION 2 - IN BOX:
Remove perforated top of case box. Place in fridge where air circulation is the strongest. Thaw time 2-3 days depending on air flow.

TRADITIONAL OVEN

Place wrapped burritos directly on oven rack or tray with label on. If oven is full, rotate burritos half way through.

PRO TIP: Adjust time for convection ovens.

THAWED

🌡️ 350°F ⌚ 20min

FROZEN

🌡️ 300°F ⌚ 40-50min

MICROWAVE (NOT OUR FAVORITE)

Slit the wrapper with one of our burrito openers to allow for proper ventilation and even heating.

PRO TIP: Microwave thawed burrito for only 60sec, then finish on flat top or panini press to crisp tortilla.

THAWED

⌚ 1.5min

FROZEN

⌚ 2.5-3.5min

WARNING!

Slit the wrapper, but don't open it. Microwaving with no cut in the label will result in too much pressure (💣), while an open wrapper will cause too much steam loss, slowing the heating process.

Microwave cook times vary due to wattage.

PANINI OR GRILL PRESS

Place unwrapped burrito on pre-heated press until tortilla is golden brown or desired level of crispiness. To decrease mess, use parchment paper, if necessary.

PRO TIP: Pre-cook in microwave for 60sec.

FROM THAWED ONLY

🌡️ 450-500°F (or max temp) ⌚ 4-6min

AIR FRYER

Set air fryer to "air crisp" mode (or similar) and place the unwrapped burrito directly on the rack or tray.

PRO TIP: We strongly suggest thawing burrito first. Heating from frozen is doable but not recommended.

THAWED

🌡️ 400°F ⌚ 4-6min

FROZEN

🌡️ 315°F ⌚ 25min

HIGH TEMP / TURBO OVENS

High temp ovens are a great way to heat our product, but temperatures and methods vary greatly.

Please email details about your oven and needs to Hello@DisBurrito.com for oven settings.

HOT HOLDS: Once heated, burritos can be held between 140 and 150°F (to avoid leakage, do not exceed) for up to 4 hours. Once finished in hot hold, burritos cannot be cooled or heated again.
