

Create phone-free environments that support focus without sacrificing safety or operational control. As over 25 states implement classroom cellphone bans and 77% of U.S. schools already enforce some form of phone policy, consistent enforcement is quickly becoming a district priority.

The CellGuard® Phone Storage System offers two scalable solutions designed for K–12 schools: an individual student pouch, a secure storage cabinet, and a wall-mounted cabinet option.

Whether schools prefer student-retained storage or centralized device collection, CellGuard provides a practical path from policy to practice. Each solution reinforces accountability, reduces distractions, and supports compliance with evolving state phone bans. There are no subscription fees and no complex infrastructure required.

From classroom-level rollout to schoolwide implementation, CellGuard makes enforcement clear, consistent, and manageable.
