

oven cavity liner

For **conneX 12** and **eikon e2s*** models only.
*post 2019 models, that use stubs to hold the cook plate.

Revolutionising cleaning for a Merrychef conneX® 12 oven

The liner covers the walls and door of the oven cavity, capturing food debris and grease. This leaves just two surfaces to clean, resulting in significant savings on cleaning chemicals and labour time.

Reducing chemical usage helps the environment by cutting down on plastic bottle waste, reducing storage requirements, and lowering your carbon footprint.

A constantly cleaner oven provides the foundation for optimum oven performance, minimising downtime and maintenance costs and extends the lifespan of your oven.

The new oven cavity liner makes cleaning the Merrychef oven even easier and delivers operational cost savings:

90%

reduction in chemical usage*

90%

reduction in protector usage*

76%

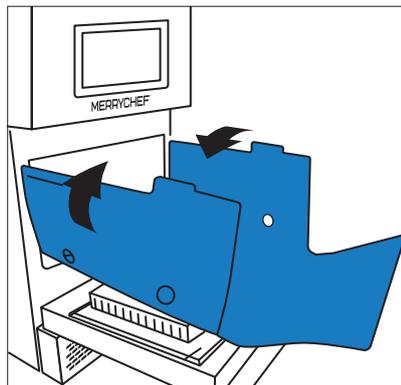

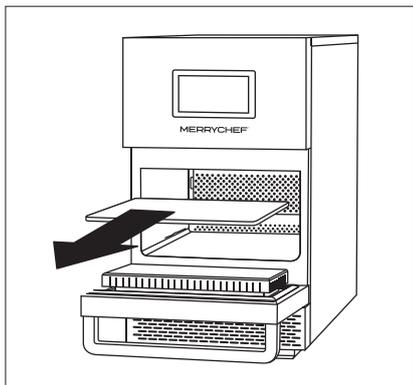

reduction in labour time to clean ovens*

* Based on internal Merrychef calculations

oven cavity liner

Easy to install

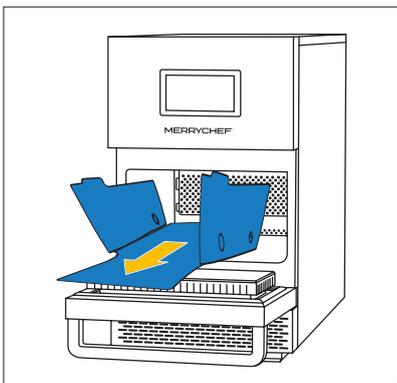

Gently remove the cook plate from the oven.

Place the oven cavity liner inside, ensuring the back of the oven remains uncovered.

Scan the QR code to access a brief, step-by-step installation guide.

Easy to clean

Wait for the oven to cool completely before removing the cook plate and cavity liner.

Wash the liner with warm, soapy water. It is dishwasher-safe, though frequent dishwasher use may shorten its lifespan.

Cleaning and protector chemical is now only applied to the back of the oven.

Ensure the liner is fully dry before placing it back in the oven.

With proper use and daily cleaning, the oven cavity liner typically lasts around six months, depending on usage.

Accessories

Continue to use Merrychef accessories, such as liners and trays, with the cavity liner in place to keep food and grease off the cook plate while expanding your menu options.

Coloured trays help you easily switch between different food types, such as meat and plant-based items, avoiding cross-contamination.

The Merrychef panini press can be used as normal within the liner.
