NESTABLE POLY STEP STOOLS

A poly step stool is a great asset for on the go or in a permanent setting. It has a lightweight design with front and side cutout handles that allows the user to easily transfer it to a preferred spot. The taped step surfaces ensure safe footing while traversing up and down the steps. The handrails allow the unit to be pushed or pulled into the desired position, minimizing bending and twisting by the user. Steps can be nested to minimize footprint when not in use. 500 lb. uniform capacity across all models.
