

Ensure workplace secondary chemical containers are labeled properly with the OSHA Hazard Communication Standard. Preprinted and handwritable, Avery GHS Secondary Container Labels make it easy and convenient to label your workplace containers quickly.

- Make safety a priority with proper chemical labeling on workplace chemical containers
- Handwrite with ballpoint pens and permanent markers like Avery Marks-A-Lot markers
- Labels are waterproof and resistant to chemicals, abrasion, water, tearing and harsh temperatures

- Create a safer workplace with proper chemical labeling on onsite secondary chemical containers
- Permanent adhesive works on metal, plastic, painted surfaces, glass and more
- Apply as low as 10 degrees Fahrenheit

Simply use a ballpoint pen or permanent marker to fill in the hazardous chemical details.

Peel and apply the completed label to your workplace chemical container to comply with OSHA.

Labels come preprinted with the HazCom labeling elements.
