

# PRINTABLE REFLECTIVE SIGNS & LABELS

## Avery Reflective Safety Signs & Labels

### Print High Visibility Labels On-site

Improve the visibility of safety signs in lowlight situations and scan barcodes from further distances. Print on-site using a standard laser printer to respond quickly to safety and facility labeling needs.

### Durable Retro-reflective Material

Retro-reflective labels use glass bead technology that directly reflects light at the same angle as it's received.

## Highlights

### Product Features

- High visibility retro-reflective material
- Chemical, water, abrasion, tear and UV resistant (up to 2 years outdoor use)
- Print using standard laser printer
- Permanent adhesive works well on metal, plastic, wood, walls and more

### Free Templates

Customize with free OSHA-compliant templates at [avery.com/customize](https://avery.com/customize)

Keep your employees safe!

### Create High Visibility Safety Signs

Select from hundreds of pre-designed OSHA safety sign and label designs to keep employees safe in low light areas.

### Use for Long Distance Scanning

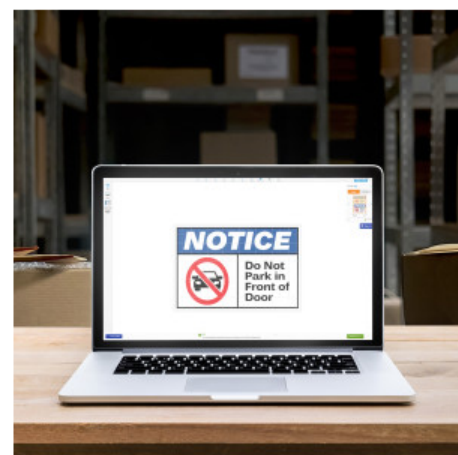

Create retro-reflective barcode labels and apply to racks to make it easier to scan from long distances.

### Works Indoors and Outdoors

Durable reflective labels are suitable for long-term indoor use and last up to 2 years outdoors.

## Easy to customize and print

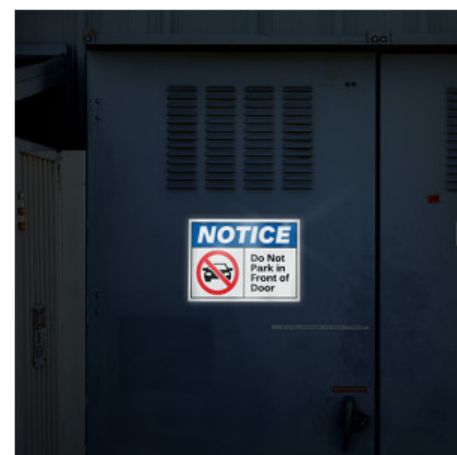

### Customize

Simply use the free blank or OSHA-compliant pre-designed templates and customize as needed. Add photos, company logos and more.

### Print

Print using a standard laser printer, and save your projects to your MyAvery cloud account or your computer.

### Apply

Apply your reflective safety signs and labels wherever needed to keep employees safe as quickly as possible.
