

ONLY CORDLESS MODEL

SHORTENING SHUTTLE®
THE BOSS SERIES

YOUR FRYER NEEDS FILTERING. YOUR OUTLET CORD DOESN'T REACH.

Every corded oil filter machine assumes you have 120V within reach. Food trucks, ghost kitchens, catering rigs, and remote serving stations don't. The BOSS is the only battery-powered commercial fryer oil filter on the market — and it costs less than the competition.

MSRP **\$3,495** · Ask your Dealer for special pricing

★ Made in the USA · Leominster, MA

THE PROBLEM

Every corded filtration machine on the market requires a 120V outlet. That eliminates food trucks, catering trailers, ghost kitchens, festival setups, and stadium remote stations — exactly where filtration is most neglected.

THE SOLUTION

The BOSS runs on an 18V lithium-ion battery. No cord. No outlet. No compromise. Professional 2-stage filtration and waste oil transport in one unit — at a lower price than leading corded competitors.

WHY THE BOSS WINS

ZERO CORD DEPENDENCY

18V lithium-ion battery-powered pump. Two batteries included — filter with one while one charges. Works anywhere, anytime.

2-IN-1 SYSTEM

Filters and transports waste oil in a single unit. Eliminates a separate disposal container — fewer trips, zero open-pot danger.

UP TO \$2,304 LESS THAN COMPETITORS

Competitors priced up to \$2,304 higher on current market listings. More capacity (95 lb) and \$0 recurring filter costs — for a fully cordless machine.

2-STAGE STAINLESS FILTER

Basket pre-filter + stainless canister filter for microscopic filtration. Both dishwasher-safe and reusable. Extra canister included.

UNIVERSAL FRYER FIT

Works with any commercial fryer with 11" minimum drain height. No brand lock-in, no special adapters required.

FULL SAFETY KIT INCLUDED

Hinged cover prevents hot oil splash. Ships with heat-resistant gloves, protective apron, and safety glasses — ready day one.

PERFECT FOR EVERY OPERATION
