

FREERANGE INDUCTION SERIES

FreeRange Induction Series

portable power, endless possibilities

Meet the world's first Lithium Ion Battery-Powered Induction Stove, capable of both Warming and Cooking. Powered by dual removable Lithium Ion batteries, this stove offers continuous performance anywhere you want to go.

- ✓ Warming Mode (300W)
- ✓ Cooking Mode (1000W)
- ✓ Dual Battery Charging Station
- ✓ Live Swap Batteries
- ✓ Best in Class Warranty
- ✓ Decorative Wood Covers

WARMING MODE (300W)

The Dual Battery design lasts over 5 hours on warming mode simmering water @ 200°F. Featuring a solid-state induction design, warming mode is fast, efficient, and ultra quiet due to not active fans or moving parts.

COOKING MODE (1000W)

Set up Action Stations anywhere! Switch from Warming Mode to Cooking Mode at the press of a button. With two batteries required for this mode, the cooking time is estimated at 1-1.5 hours.

LIVE SWAP CAPABILITIES DURING WARMING MODE

In Warming Mode, the system runs off one battery until fully discharged and then switches to the 2nd battery on board. This gives you the ability to live swap the batteries and extend service time on the fly.

DUAL LITHIUM ION BATTERIES (NMC)

Designed with Lithium Ion NMC technology, the batteries are guaranteed with a 12 month warranty with an expected life of 1000 charge cycles retaining at least 80% capacity. Each individual battery has Battery Management System (BMS) that protects the battery from overheating, over charging, and over discharging.

FREERANGE BATTERY POWERED DC INDUCTION STOVE

DC-100

- LIVESWAP DUAL BATTERY
- WARMING MODE (300W)
- COOKING MODE (1000W)
- 13" X 13" X 4"

DC-100-RC

- The remote control is sold separately
- Control your induction stove on-the-go and from a distance
- Great for keeping up in busy foodservice environments

NMC BATTERY

Nickel Manganese Cobalt Oxide Batteries provide added safety and longevity.

- We provide a one-year warranty, ensuring the battery retains at least 80% of its capacity within that period

DC-48V-10AH

48V, 10AH, 12.9" X 4.33" X 2.33"

DUAL BATTERY CHARGING STATION

Charge two batteries simultaneously for maximum efficiency. The Smart Charging design will charge to 80% in 2 hours and 100% in 4 hours.

DC-CHARGER

110V / 1200W / 10A
