

THE STORY

Testing emergency equipment can be dangerous and time consuming. Our TESS Tool decreases the time it takes to test emergency equipment and keeps employees on the ground, minimizing the risk of costly ladder accidents.

BENEFITS

- Decreases struck-by injuries and fall accidents by reducing employee ladder use
- Minimizes exposure to costly litigation and medical damages caused by ladder accidents and injuries
- Maximizes employee efficiency by reducing the time it takes to test equipment

FEATURES

- Rubber coated testing head protects user against electric shock injuries
- Tests alarms, lighting, security equipment, smoke and CO2 detectors, gauges, meters, controllers and more
 - Use to test employee alarm systems for compliance with OSHA Standard 29 CFR, 1019.154(d)(2)
 - Use to test emergency lighting systems for compliance with NFPA Life Safety Code, Standard 101, Section 31-1.3.8
- Universally designed Testing Head easily accesses a variety of reset buttons
