

Advanced Safety and Disinfection

Cleaning, disinfecting and sanitizing is an essential part of keeping employees and customers safe. EcoLogic proudly offers **eFFectant**, a highly effective sanitizer and disinfectant, generated through electrolysis in an Electrical Chemical Activation (ECA) device, for a greener and safer clean business.

eFFectant is a Ready-to-Use, hospital grade, non-toxic disinfectant cleaner that leaves behind no residue. Simple to use and safe to handle, businesses do not have to compromise on efficacy or safety for disinfection.

ECA Onsite Generator

#3520

#3525

Proven to Kill Human Coronavirus

Meets EPA standards* for efficacy against Human Coronavirus and Norovirus surrogate (feline calicivirus)
*> log 4 viral load reduction using AOAC Use Dilution Method with 5% soil load

Certified & EPA Registered

eFFectant is EPA registered and Green Seal Certified and is proven to be effective against Salmonella, Staph, MRSA, Swine Flu (H1N1), E.Coli, Listeria and more.

Complete Suite of Cleaning Products

EcoLogic Solutions has a complete line up of environmentally preferable cleaning products and disinfectants, including hand sanitizer and hand soap.

What is HOCl?

Hypochlorous Acid (HOCl) is a form of Free Available Chlorine that is known to be up to 100 times more effective as a sanitizer or disinfectant than chlorine bleach that does not leave a toxic residue on surfaces and is overall non-toxic to higher life forms. In fact, the human body naturally produces HOCl to fight infection. Our patented ECA technology produces this sanitizer and disinfectant using just salt, water and electricity.
