KEEP PRODUCE FRESHER LONGER*

The RCP FreshWorks™ Produce Saver regulates the flow of oxygen and ethylene, creating the optimal environment to store fruits and vegetables. By allowing the produce to “breathe”, they stay at their peak freshness for a longer period of time, reducing the amount of food thrown away due to spoilage.

*Based on produce stored in RCP FreshWorks™ Produce Saver vs traditional food box.

FILTER

The integrated filter naturally regulates the flow of oxygen to allow produce to remain fresh for an extended period of time.

DRAIN TRAY

The built in drain tray promotes air flow while elevating produce from any residual moisture, preventing a soggy product.

AIR TIGHT LID

The air tight lid is easy to open and close helping to create the perfect environment within the container.

RESULTS THAT ADD UP

Lettuce is the most common produce purchased in the U.S. Once cut, lettuce starts to spoil in less than 48 hours. When stored in the Produce Saver, this can be extended for up to a week.* Produce Saver also keeps uncut lettuce fresh up to two times longer than when storing it in a traditional food box.*

The filter works with a variety of the most common types of produce commonly stored in traditional food boxes: lettuce, leafy greens, tomatoes, strawberries, onions, peppers, carrots, and more.

*Based on romaine lettuce stored in RCP FreshWorks™ Produce Saver vs traditional food box.

IMPROVED LIFE EXPECTANCY WITH FRESHWORKS™ PRODUCE SAVER

TYPE OF PRODUCE

% OF LIFE EXTENSION

LONG LASTING

The filter never needs to be changed or replaced. Made from heavy duty polycarbonate, the product is dishwasher safe.

EASY TO STORE

Produce Saver nests with standard food boxes, allowing your kitchen to stay organized.
