

Ice-O-Matic®

CHEWABLE-ICE MACHINES BUILT FOR PERFORMANCE

Three Ice Types. One Proven Platform.

Consumer-Preferred Ice That Can Drive Beverage Growth

Not all chewable ice is created equal. Pearl and Quartz are compressed flake ice engineered for true chewability, with approximately 75% and 85% frozen water respectively. Creating a softer, consumer-preferred texture that can help enhance beverage appeal, support customer satisfaction and strengthen beverage programs.

Consumer preference studies have linked chewable ice to stronger beverage appeal, with one NACS taste test reporting 85% preference for nugget ice over alternatives.

Three Ice Types. Distinct Advantages.

Flake

- Moldable, gentle ice texture
- Continuous ice production
- Ideal for specialty cooling applications

Recommended for:

- Healthcare
- Food Display
- Produce / Seafood

Pearl

- Soft, consumer-preferred chewable ice
- Approximately 75% frozen water
- Engineered for true chewability

Recommended for:

- C-Stores
- Restaurants
- Hospitality

Quartz

- Harder chewable ice engineered for dispensers
- Approximately 85% frozen water
- Slower melt rate for extended beverage hold times

Recommended for:

- C-Stores
- Restaurants
- Hospitality
- Coffee Drive-Thrus

Pearl and Quartz ice displace more liquid in the cup, which may help reduce syrup usage while still delivering a full, satisfying beverage.

A Proven Platform, Built to Endure

Chosen by major beverage chains and other demanding operators, the Ice-O-Matic continuous ice platform has earned a reputation as a reliable workhorse, built for long-term performance.

- Robust auger and freezer barrel design
- Proven breaker technology for consistent ice formation
- Designed for demanding, high-volume applications

You can save up to \$1000 a year in electricity costs with an Ice-O-Matic Pearl & Quartz machine. The GEM machines offer best in class energy savings as compared to all other self-contained nugget ice makers.

Built for Efficiency

Designed to support lower operating costs through efficient water use, dependable performance and models that qualify for ENERGY STAR rebates.

Quartz Ice Advantage

Quartz ice eliminates the need for soft ice diverters and bin thermostats, allowing operators to utilize the full storage capacity of a dispenser.

Configurations for Virtually Any Application

GEM

415-1,800 lbs
of ice per day

HEM

365-1,500 lbs
of ice per day

MFI

465-2,100 lbs
of ice per day

Available in 21" and 30" widths

Condensing types:

Air Cooled / Water Cooled / Remote Systems

Ice Storage Options

Bin Width	Bin Storage	COMPATIBILITY	
		21" W	30" W
30"	344 lbs	Compatible	Compatible
22"	351 lbs	Compatible, but adapter needed	—
30"	510 lbs	Compatible	Compatible
48"	854 lbs	Compatible, but adapter needed	Compatible, but adapter needed

Compatible = Compatible Compatible, but adapter needed = Compatible, but adapter needed
