

INTERLAKE MECALUX PALLET RACK BOLTED UPRIGHTS

The Interlake Mecalux **bolted teardrop upright frames** are the primary vertical components of pallet rack systems, designed to provide strong and reliable structural support for heavy-duty warehouse storage. Unlike welded frames, bolted frames feature bolted connections between horizontal and diagonal bracing members.

Bolted Strut Connection

- Bolt connections on frame components are Grade 5 and zinc plated.
- Limited thread bolts prevent over-tightening.
- Nuts with a serrated flange remain securely fastened, with no need for maintenance.

Teardrop Upright Column

- Durable, Simple shelf adjustment at 2-inch vertical intervals with teardrop punch design.
- Side perforations are used for accessories such as row spacers and column protectors
- Standard blue cataphoresis finish

Foot Plate

- Bolted foot plate for unit stability and floor anchoring.
- Standard foot plates have two anchor holes to secure to the floor.
