

INTERLAKE MECALUX BOLTED SELECTIVE PALLET RACK

Interlake Mecalux **bolted selective pallet rack** provides total accessibility to the product. Both popular and durable, this racking system provides versatility for warehouses that have a wide variety of product types. It is manufactured from high-strength steel and other quality raw materials.

Selective pallet rack components are roll formed. The teardrop beams are mounted to the frame and secure in place with a piston lock connector. Thus, beams are properly fitted without the risk of accidental disengagement and are set up for easy reconfiguration.

Key Features

- Direct access to each pallet or product.
- Simple stock management.
- The most popular and versatile racking system in the industry.
- Adapts to any product volume, weight or size.
