

Multipurpose Sinks and Mop Service Basins

Wring in the new way of cleaning up

'Everyday' use doesn't mean average will do.

It's the opposite. Keeping your environment looking like new takes multipurpose sinks and mop service basins that will hold up to heavy-duty tasks, over and over.

We manufacture our models using a proprietary polypropylene molding process. On top of lasting strength, the seamless corners and edges make cleanup easier for maintenance staff.

What goes in must go down

Cleanup isn't easier if it keeps clogging. Every sink and basin are designed with the ideal depth and drain without problem. Don't strain yourself from lifting and pouring out. The drain plug prevents debris from getting in the way of your job.
