**WIDTH** - 60" **COLOR** - NATURAL & GRAY  
**DEPTH** - 95" **WEIGHT** - 136.3 LBS  
**PART #** - GRAY #22394 | NATURAL #22395

NON-RECESSED  
250 GAL

The Satellite non-recessed 250-gallon rotationally-molded polyethylene holding tank is a versatile solution for various applications. Its low-profile design, measuring 6' x 3' x 18", ensures it fits seamlessly into tight spaces. Each tank typically includes one 10" manway and four 3" cleanout ports, but custom configurations with as few as two ports are also available. Every port is equipped with a uni-seal grommet and threaded PVC connector, ensuring secure and reliable connections. Choose this tank for its adaptability and dependable performance.

RECESSED  
250 GAL

The Satellite recessed 250-gallon holding tank is engineered for superior performance and versatility. Equipped with six recessed 3" Fernco-style couplings and a 12" manway, it also offers an additional location for a 10" manway, providing you with flexible access options. The tank's deep channels enhance its strength and rigidity, enabling multiple tanks to be stacked without any risk of warping. Choose this tank for its robust design and adaptability, ensuring reliable performance in any application.
