Film/Sealer Size?

- Measure the width and height of your package and add 5-10% to the measurement. This will provide you with the minimum shrink bag width
- Measure the length and height of your product and add 5-10% to the measurement. This will provide you with the maximum shrink bag length
- For shrink film (centerfold), take the smallest figure of the two to determine the shrink film width needed

Heat Guns

HG-1 / HG-1-CY

- Value option for low volume
- Two temperature settings

HG-501D

- Shrinks faster
- Long life universal motor 2X run life

Micro Knife Sealing

The Micro Knife Sealing Technology is the most advanced system available on the semi-automatic L-Bar sealer. This PTFE-coated blade is guaranteed not to break for a full year or we will replace at no cost. PTFE coating allows the film to seal with minimal smoke or residue and produces straight seals with no pinholes. It is simply the best seal system on the market.

Vacuum Sealers

FEATURES:

- Extracts air around a product then seals the product in an impermeable package
- Impulse sealing requiring no warm up time
- Full line of vacuum sealers to suit all types of applications

Nozzle Vacuum Sealers

How does it work?

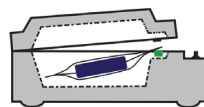

Nozzle on the vacuum sealer pulls the air out of the bag

Features

- Most versatile vacuum sealer we carry
- Fastest vacuum sealing
- Length of seal bars will determine the maximum length of bag

Requirements

- Pneumatically operated which requires an external compressor
- Cannot vacuum seal liquids or powders

Chamber Vacuum Sealers

How does it work?

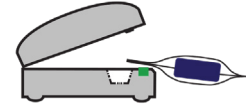

Bag is placed in chamber and bag is vacuum sealed by changing atmospheric pressure inside the chamber

Features

- No external compressor required
- Can vacuum seal liquids and powders
- Can vacuum seal multiple bags

Requirements

- Chamber size will determine the maximum bag sizes allowed
- Vacuum cycle takes longer than nozzle vacuum sealers

Channelled (External) Vacuum Sealers

How does it work?

Bag is placed in a small channel in the vacuum sealer. The vacuum sealer pulls out air from the bag

Features

- No external compressor required
- Usually inexpensive and light weight

Requirements

- Requires special/embossed bags which are more expensive than standard vacuum bags
- Length of seal bars will determine the maximum length of the bag

Vacuum Sealers - Nozzle

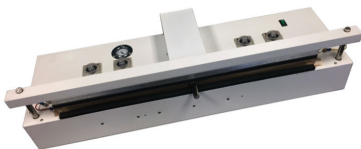

FEATURES:

- Most versatile vacuum sealers
- Seal lengths: 12" - 50"

VV-305T

- Double impulse to seal through thicker materials
- External compressor required
- Sealing length: 12"
- Seal width: 5mm

MADE IN THE USA

AVS, AVN, CAVS, CAVN

- Venturi vacuum system
- External compressor required
- Sealing length: 20", 25", 30", 35", 50"
