

# The Universal Changing Table That Changes Everything.

## ASCENT

SOVA

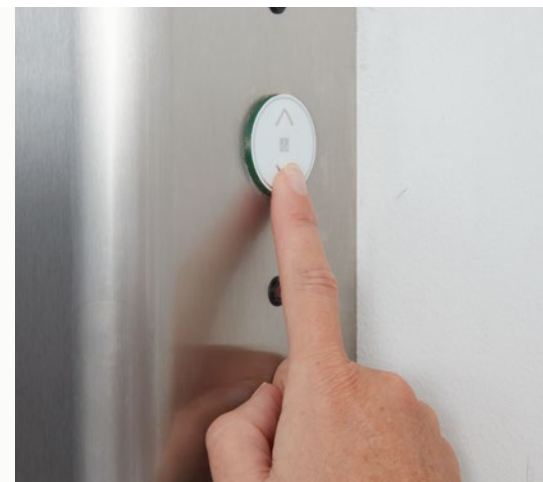

## This Is What Inclusion Looks Like.

Universal Changing Tables (UCTs) are more than a feature. They're a signal that says your space welcomes everyone. We listened to feedback from our customers and are now pleased to offer the new **Ascent 70**, which comfortably accommodates adults in its vacuum-formed 70" tray while maintaining a compact footprint ideal for smaller restrooms.

## And the world is noticing.

- The International Building Code (E142-21) now mandates UCTs in public facilities
- 26 U.S. states have adopted or proposed their own regulations
- Cities, stadiums, museums, and schools are rethinking public washroom design
- All major U.S. airports required to have UCTs in all terminals by 2030

## Now available with a more compact 70" footprint to meet real world needs.

# Designed for Dignity. Built for the Real World.

People with disabilities.  
Caregivers. Architects. Facilities  
Managers. Ascent was built  
for the people who rely on  
it and the professionals who  
make it possible.
