INTUITIVE DESIGN & REALTIME FEEDBACK

The cordless design removes setup limitations, enabling seamless integration into action stations, catering setups, and dynamic service environments.

Designed with operator efficiency in mind, the unit features intuitive controls, a backlit display, and clear “induction on” indicators for real-time feedback.

FLEXIBLE, SAFE CHARGING ECOSYSTEM

The LiFePO4 battery system is certified safe with full ETL-, UL-, FCC, RoHS, & UN38.3 certification. It's removable battery packs, standalone AC charging options, and ability to charge units while in service gives operators the ability to expand service capabilities without expanding infrastructure.
