

Wood Stone tools shown have heavy-duty stainless handles and grease-resistant grips.

A. SCRAPER TOOL

The Scraper Tool is useful for scraping the deck floor and removing heavy, baked-on debris and buildup. A stainless steel handle, grease-resistant grip and angled head provide plenty of leverage, even in the rear of the oven.

WS-TL-S-60 Small/Medium Handle, 60"

WS-TL-S-70 Long Handle, 70"

WS-TL-S-80 Extra Long Handle, 80"

B. PITA PEEL WS-TL-PP-63

The 63" basket-style Pita Peel is designed for scooping up multiple pitas, finishing them in the dome (without overheating) and removing them. No other tool can perform these functions as well. The handle is stainless steel, and the basket is sturdy, lightweight aluminum.

C. FLOOR TOUCH-UP TOOL WS-TL-TU

The 67" Floor Touch-Up Tool provides a means to smooth minor surface irregularities on the oven deck, especially when a slightly uneven surface has developed due to a crack in the oven deck.

D. COAL OVEN RAKE

The triangular hoe-style Coal Oven Rake is useful in coal-fired ovens for manipulating coal inside the oven chamber, as well as scraping debris and fly ash through the coal grates and into the ash chute.

Available in two lengths:

WS-TL-CR-M Medium Handle, 63"

WS-TL-CR-XL Extra Long Handle, 84"

E. TOOL GRIP 3000-0005

Replacement grease-resistant Tool Grip for any stainless steel handled Wood Stone oven tool. Minimum order of two.
