## Clearing a Clog

<p><b>1</b></p>	 <p>Restricted airflow light indicator comes on, please check the following things.</p>	<p><b>2</b></p>	 <p>Check to see if bag is full or if the tube, hose or nozzle is blocked. Replace bag if needed.</p>	<p><b>3</b></p>	 <p>Remove the upper hose and wand to inspect for clogged debris. Detach the wand receptacle.</p>
<p><b>4</b></p>	 <p>Release and remove the brush cover by unlocking the bearing lock then pull brush out.</p>	<p><b>5</b></p>	 <p>Inspect lower hose by looking through the wand receptacle to the brush housing area. <i>(You should have a clear view. If not, there is a clog)</i></p>	<p><b>6</b></p>	 <p>Remove debris by pushing it forward via the brush opening <i>(use a long narrow object if needed)</i>. Reinstall brush and brush cover. Reattach wand receptacle.</p>
