

Cleaning Information:

Rubber products should be cleaned daily, depending on usage. Mix mild detergent or non-butyl degreaser with hot water and scrub thoroughly with a brush. Rinse with hot water.

Do not use bleach or any butyl-based degreaser, regardless of the establishment in which this mat is used – usage of these chemicals will void product warranty.

Exposing the mat to any other chemicals may adversely affect how well the mat works, and improper cleaning, handling, folding or use of commercial dishwashers to clean mats will shorten the useful life of the mat and may void the warranty.
