

# CPG Countertop Ranges

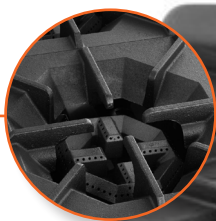

## Find Your Perfect Countertop Solution

Powerful, high output 22,000 - 30,000 BTU burners – available in quantities of 2, 4, and 6 per range – cook food reliably and efficiently in demanding kitchen environments.

Each burner is covered by heavy-duty cast iron trivets for increased durability and protection from spills and clogs.

A 3/4" rear gas connection readily connects to a natural gas supply, or easily converts to liquid propane with an included orifice kit.

Standard burner configuration makes it easy to slide cookware from one burner to the next, while the step-up design allows for easier access to the back burners.

Four adjustable feet increase the unit's stability on your countertop and ensure tabletop elevation compliance for your equipment.

The convenient, built-in standing pilot offers instant ignition for an immediate flame whenever you need it.

## Step Up Your Stovetop

Maximize your limited cooking space while optimizing your staff's performance to set your establishment apart with Cooking Performance Group countertop ranges / hot plates. Utilize the counter space you already have available in your kitchen by designating a countertop spot for your range rather than dishing out valuable space for a standalone piece of equipment, without reducing the quality of your finished products. Offering as much reliable fuel power as a built-in range, these countertop ranges efficiently boil pasta water, expertly sear prime cuts of steak, and carefully caramelize dessert sauces with ease for versatile preparation of all your signature dishes. Each unit is equipped with cast iron trivets, instant ignition standing pilots, and adjustable feet for optimized performance. Available models include 2-, 4-, or 6-burner options with standard and step-up burner configurations.
