

Sandwich Cutter

What is it?

A new handheld rocker blade to cut sandwiches post bake.

Where do you use this?

The sandwich cutter should be kept at the cut table and used to cut the sandwiches in half post bake.

How do you use it?

Hold the tool at the top handle, place on top of the sandwich and press down until sandwich is cut all the way through.

Why are we selling this?

We are selling a separate tool for cutting sandwiches to help with TM safety and better product quality with sandwiches getting cut all the way through vs using a spatula which tends to be more difficult.

The sandwich cutter can be sharpened with the wall-mounted sharpener just as you would with the larger rocker blades used to cut pizzas.
